Dear Mr. Holland:

This is to acknowledge that your notification of intent to use the authority of Rule 62-210.310 to operate your facility was received on December 26, 2007. We have assigned ARMS Number 0190075-001 to this facility.

As you know, pursuant to Florida Statutes section 403.814, authority to operate under general permits commences thirty days after receipt of the registration form unless you have been notified by this office that your facility has not shown entitlement to operate pursuant to the rule provisions.

For your information, authority to operate pursuant to Rule 62-210.310 expires after 5 years. Therefore, a new registration form must be received no later than 5 years after the date your notice was received as indicated above. If your general permit rule conditions require testing, such testing must be completed within the time frame specified in the rule.

If you have any additional questions, please contact Dickson Dibble at 850/921-9586.

### Material Usage Rates

If this is an **initial registration** for a reinforced polyester resin operation, provide an estimate of the total quantity, in pounds, of styrene-containing materials (resin and gelcoat) expected to be used over a 12-month period. Note: the general permit limits the usage of such material to 76,000 pounds (38 tons) in any consecutive 12 months.

PG100 poly resin - 60 gal @ 9 lbs/gal = 540 lbs  
gelcoat - 10 gal @ 11 lbs/gal = 110 lbs

If this is a **re-registration** for a reinforced polyester resin operation, provide the highest 12-month total quantity, in pounds, of styrene-containing materials (resin and gelcoat) used in the last five years. Indicate the 12-month period over which this usage occurred.

### Description of Facility

Below, or as an attachment to this form, provide a description of the reinforced polyester resin operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

We are a small full service Boat yard hauling & working on boats up to 45-50 feet we do fiberglass repair only. we do not manufacture boats or any other Polyester Products. as above we use approx 60 gal of Polyester resin a year and approx 10 gal of Polyester gelcoat most of our repairs are done indoors in which case it is swept up vacuumed & disposed in dumpster, there will be times that we will do small repairs outdoors in which case we cover project with plastic and clean up on a daily basis all of our Bottom sanding is done with vacuum sanders, we are at the final stages of becoming a Florida Clean Marina & Clean boat yard. the Florida Clean Boat yard Program is a state run Program designed for Best Management Practices for boatyards. we work hard to keep up to these standards. If I can be of any further assistance please call Holland marine 904 294-3349
