Description of Reasonable Precautions

Below, or as an attachment to this form, provide details of all types of reasonable precautions to be used to prevent unconfined emissions at the facility.

Water application is used as needed to control unconfined particulate matter.

Description of Facility

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

This facility operates a ready-mix concrete batch plant with two silos, batching equipment, mixing trucks, aggregate and sand storage bins, conveying equipment and an office

The western most silo is cylindrical and contains fly ash. The emissions from loading the silo are controlled by a silo-top mounted C&W Model CP-LPR-6 baghouse. The serial number is unknown.

The eastern most silo is square shaped and contains concrete. The emissions from silo loading are controlled by a C&W Model CP-LPR-6 silo-top mounted baghouse, the serial number is unknown for this unit.

Emissions truck batching operations are controlled by a ground-mounted C&W Model RA-140 central dust collector, the serial number is unknown. The weigh scale for the truck loadout is controlled by a C&W Model CP-35 dust collector, the serial number is 8671.
