Good Afternoon,

Here is the supplemental information for the Air Permit for Lake Forest Crematory.

We currently operate an IEE Power Pak II human crematory. This unit is designed for at least a 1.0 second gas residence time in the secondary chamber @ 1800 degrees Fahrenheit. The operating temperature is at least 1600 degrees Fahrenheit in the secondary chamber during combustion in the primary chamber. This unit is equipped with a pollution control device which measures the opacity in the stack. This unit also has a chart recorder for measuring time and temperature. This unit is maintained according to the manufacturers requirements.

If you need anything else please let me know.
