AIR GENERAL PERMIT REGISTRATION FORM

Bureau of Air Quality
& Mobile Sources

Part II. Notification to Permitting Office

(Detach and submit to appropriate permitting office; keep copy onsite)

Instructions: To give notice to the Department of an eligible facility's intent to use this air general permit, the owner or operator of the facility must detach and complete this part of the Air General Permit Registration Form and submit it to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Please type or print clearly all information, and enclose the appropriate air general permit registration processing fee pursuant to Rule 62-4.050, F.A.C. (\$100 as of the effective date of this form)

0570241-004

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- ☐ Construct and operate a proposed new facility.
☐ Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- ☐ Continue operating the facility after expiration of the current term of air general permit use.
☐ Continue operating the facility after a change of ownership.
☒ Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

- ☒ All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s):

AIRS ID 0570241

- ☐ No air operation permits currently exist for this facility.

☐ **Spray Bar**☒ **Chute**☐ **Enclosure**☐ **Partial enclosure****Description of Reasonable Precautions**

Below, or as an attachment to this form, provide details of all types of reasonable precautions to be used to prevent unconfined emissions at the facility.

Reasonable precautions are taken to control unconfined emissions from hoppers, storage areas and conveying equipment, conveyor drop points, roads, parking areas, stock piles, truck load out and yards as required by Rule 62-296.320(4)(c) F.A.C. Precautions taken at this facility are as follows:

Regular sweeping and/or the application of water is used to suppress fugitive emissions.

If necessary, the height of stock piles are reduced and the aggregates are sprayed.

Description of Facility

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

This Air General Permit Registration is to add a silo to an existing facility.

The facility is a concrete batch plant and consists of a parking area, aggregate storage area, material storage silos and an office. White cement, flyash and slag are used in the concrete batching process and are contained in the silos. The materials are pneumatically transferred from tanker trucks to the storage silos. During the transfer of material, each silo utilizes a dust collector to control particulate emissions.

The silos are identified as follows:

EU 001 Flyash Silo } *CENTRAL BAGHOUSE*
~~EU 002~~ Load Out }
EU 002 Split Silo Compartment 1 (South)
EU 003 Split Silo Compartment 2 (North)
EU 004 Slag Silo

EU 001 and 002 the flyash silo and weigh hopper are served by a single Engineering Service Model ES-E963 central baghouse dust collector. EU 003 and 004 are each served by WAM Model FJS-250 cartridge dust collectors. EU 005 is served by a C&W Dust Systems Model CP-230-639 Cartridge Dust Collector.

Kaye,

I am apologize for the inconvenience, but I am unable to accept the registration form as submitted.

After a cursory look through, I discovered that all pages of the form (see 1st attached .pdf file), including Mr. Belcher's signature page (see 2nd attached pdf file), which he had sent individually under separate cover minus the form, was missing the Effective Date at the bottom of the form.

For some reason it has been removed and I believe this is the second time something similar has occurred in recent months. Could there be an electronic glitch causing this to happen?

Unfortunately, the form is part of the rule and therefore in order to be considered complete it must reflect the complete and approved by-rule form.

I have already entered the equipment change renewal in our database. The thirty (30) day mandatory processing and review clock began when Mr. Belcher's signature page was received on Friday, February 5, 2010. All I need to keep this thing on track is an updated, corrected and original signed copy before the end of the time period.

Thank you for your time and consideration.

If you have any questions, comments or concerns, please e-mail or call.

Have a great day and stay warm!

Sincerely,

Dick
