Material Usage Rates

If this is an **initial registration** for a surface coating operation, provide an estimate of the average quantity of volatile organic compounds in all coatings (solvents and thinners) expected to be used on a daily basis.

NA

If this is a **re-registration** for an existing surface coating operation, provide the highest monthly average of the daily quantity of volatile organic compounds in all coatings (solvents and thinners) used in the last five years. Indicate the month and year during which this usage occurred.

December 2009 = 20.3 lbs per day

Description of Facility

Below, or as an attachment to this form, provide a description of the surface coating operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

Bill Currie Ford Collision Center repairs and refinishes automobiles. In the process we have 20 lbs of voc a day. Averaging less than 15 lbs a day in 2010. We have four active down draft paint booths with floor filters to control emissions. We are open Monday through Friday 7 am to 6 pm, and Saturdays 8 am to 1 pm.
