**Registration Type**

Check one:

**INITIAL REGISTRATION** - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

**RE-REGISTRATION** (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

**Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only**

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

- All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): \_\_\_\_\_
- No air operation permits currently exist for this facility.

**Description of Reasonable Precautions**

Below, or as an attachment to this form, provide details of all types of reasonable precautions to be used to prevent unconfined emissions at the facility. The facility has paved roads, it maintains the roads, parking areas and the yard. They have a 10 mph speed limit inside the facility to reduce particulate matter.

**Description of Facility**

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

The facility is a concrete batching plant that manufactures architectural and regular concrete blocks. The hours of operation will be from 6:00 A.M. to 10:00 P.M., six days a week. A maximum of 320 tons/day of concrete block will be produced.

Raw materials used in the process include the following:

Portland Cement Type 1 White and Type 1 Gray

Aggregates and Sand

There are two split silos, each silo has two compartments and each silo will have a capacity of 900 barrels. Contents of the silos include cement mixture, sand and rock. Each silo has two 250 square-foot baghouse dust collectors with fabric filters and they are mounted on the roof of the silo compartments. White and/or gray cement is pumped into the silo from the supply trucks at a rate of approximately 36 tons per hour. Due to economic conditions, currently only one silo is being used.
