Trina,

Our inspector, Rodell Rice, did inspections today for these facilities:

1. 0690062 Rinker, Clermont was issued a construction permit in 1993 that expired in 1999. We could not find a facility at this location.

2. 0694844 Rinker, Clermont has a General Permit in 2005. There is no concrete batch plant located at this site. Presently, there is a sand mine here. The GP should be closed.

Thanks,

Caroline Shine, Environmental Manager

0690062 Rinker, Clermont was issued a construction permit in 1993 that expired in 1999. There is no compliance actions, and I assume that this must not have been constructed. I will ask our compliance section to visit this location. There has not been a permit issued after the expiration date for this facility ID.

0694844 Rinker, Clermont has a General Permit in 2005, but I did not find 2006 and 2007 annual VEs. I will check with our compliance section to verify whether VEs were done, but this may be a compliance issue.

0690062

Rinker
