Mr. Robert C. Tucker
Environmental Manager
Maschmeyer Concrete Company, Incorporated
8123 Southwest Old Kansas Avenue
Stuart, Florida 34997

Dear Mr. Tucker:

This is to acknowledge that your notification of intent to use the authority of Rule 62-210.310 to operate your facility was received on August 11, 2008. We have assigned ARMS No. 0850139-002 to this facility.

As you know, pursuant to Florida Statutes section 403.814, authority to operate under general permits commences thirty days after receipt of the registration form unless you have been notified by this office that your facility has not shown entitlement to operate pursuant to the rule provisions.

For your information, authority to operate pursuant to Rule 62-210.310 expires after 5 years. Therefore, a new registration form must be received no later than 5 years after the date your notice was received as indicated above. If your general permit rule conditions require testing, such testing must be completed within the time frame specified in the rule.

If you have any additional questions, please contact Dickson Dibble at 850/921-9586.

Sincerely,

Sandra F. Veazey, Chief
Bureau of Air Monitoring
and Mobile Sources

**CONCRETE BATCHING PLANT
AIR GENERAL PERMIT REGISTRATION FORM**

Part II. Notification to Permitting Office

(Detach and submit to appropriate permitting office; keep copy onsite)

Instructions: To give notice to the Department of an eligible facility's intent to use this air general permit, the owner or operator of the facility must detach and complete this part of the Air General Permit Registration Form and submit it to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Please type or print clearly all information, and enclose the appropriate air general permit registration processing fee pursuant to Rule 62-4.050, F.A.C. (\$100 as of the effective date of this form)

0850139-002

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

- All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): _____
- No air operation permits currently exist for this facility.

Owner/Authorized Representative Statement

This statement must be signed and dated by the person named above as owner or authorized representative

I, the undersigned, am the owner or authorized representative of the owner or operator of the facility addressed in this Air General Permit Registration Form. I hereby certify, based on information and belief formed after reasonable inquiry, that the facility addressed in this registration form is eligible for use of this air general permit and that the statements made in this registration form are true, accurate and complete. Further, I agree to operate and maintain the facility described in this registration form so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the Department of Environmental Protection and revisions thereof.

I will promptly notify the Department of any changes to the information contained in this registration form.

Type(s) of Reasonable Precautions Used to Prevent Unconfined Emissions

Check all precautions to be used for the management of roads, parking areas, stock piles and yards:

<input checked="" type="checkbox"/> Pave Roads	<input checked="" type="checkbox"/> Pave Parking Areas	<input checked="" type="checkbox"/> Pave Yards
<input checked="" type="checkbox"/> Maintain Roads/Parking/Yards	<input checked="" type="checkbox"/> Use Water Application	<input checked="" type="checkbox"/> Use Dust Suppressant
<input checked="" type="checkbox"/> Remove Particulate Matter	<input checked="" type="checkbox"/> Reduce Stock Pile Height	<input type="checkbox"/> Install Wind Breaks

Check all precautions to be used for the management of drop points to trucks:

<input checked="" type="checkbox"/> Spray Bar	<input checked="" type="checkbox"/> Chute	<input type="checkbox"/> Enclosure
	<input checked="" type="checkbox"/> Partial enclosure	

Description of Reasonable Precautions

Below, or as an attachment to this form, provide details of all types of reasonable precautions to be used to prevent unconfined emissions at the facility.

Currently there is a 2 compartment cement silo, with a capacity of 782 barrels split in half. There are 2 C&W Model CP-305 silo dust filters mounted on top of the silo. Units are equipped with a high volume, high pressure reverse pulse jet cleaning mechanism. There are eight 8"x39" cartridges which provide 304 square feet of polyester filter media in each. The cement batcher is enclosed by a C&W CP-35 Enclosed Dust Collection system. It comes with two 8"x19" filters with 88 pleats and 36 square feet of 100% polyester filter media. Each side of the silo pipes, have anti-overfill pinch valves. A Stephen's filter system is used at the point of loading. The vacuum removes and stores particulates. The material collected is returned to the silo.

Description of Facility

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

Ready Mix Concrete is the only product produced. We are currently using 8 concrete mixer trucks for loading and delivery. Ready Mix production is approximately 300 cubic yards of concrete per day. The facility is in operation Monday-Saturday, 6 days a week. Hours of operation are usually between the hours of 6:00 a.m. to 6:00 p.m. Products being used are Portland Cement, Fly Ash and natural aggregates. A pollution prevention plan, a best management practice plan, and a measures and controls program are in place. Inspections of all systems are done on a regular basis, and training is conducted where needed.

RE: Air General Permit Renewal

Dear Mr. Dibble,

Please find enclosed the correct air general permit for the Stuart, Martin County Plant as required, per our discussion. I appreciated your help in noticing that I had sent in the old air general permit application, and not the revised one. As you are aware, the application fee was sent and not required with the enclosed application.

Respectfully,

Mr. Robert C. Tucker,
Safety, Health, & Environmental Manager
