Part II. Notification to Permitting Office

(Detach and submit to appropriate permitting office; keep copy onsite)

Instructions: To give notice to the Department of an eligible facility's intent to use this air general permit, the owner or operator of the facility must detach and complete this part of the Air General Permit Registration Form and submit it to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Please type or print clearly all information, and enclose the appropriate air general permit registration processing fee pursuant to Rule 62-4.050, F.A.C. (\$100 as of the effective date of this form)

0910101-001

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

Construct and operate a proposed new facility.

Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

Continue operating the facility after expiration of the current term of air general permit use.

Continue operating the facility after a change of ownership.

Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): _____

No air operation permits currently exist for this facility.

General Facility Information

Facility Owner/Company Name (Name of corporation, agency, or individual owner who or which owns, leases, operates, controls, or supervises the facility.)
DRS Defense Solutions, LLC

Site Name (Name, if any, of the facility site; e.g., Plant A, Metropolis Plant, etc. If more than one facility is owned, a registration form must be completed for each.)
DRS Training & Control Systems, LLC

Facility Location (Provide the physical location of the facility, not necessarily the mailing address.)
Street Address: 654 ANCHORS ST. NW
City: Fort Walton Beach County: Okaloosa Zip Code: 32548-3861

Facility Start-Up Date (Estimated start-up date of proposed new facility.)(N/A for existing facility)

Owner/Authorized Representative Statement

This statement must be signed and dated by the person named above as owner or authorized representative
I, the undersigned, am the owner or authorized representative of the owner or operator of the facility addressed in this Air General Permit Registration Form. I hereby certify, based on information and belief formed after reasonable inquiry, that the facility addressed in this registration form is eligible for use of this air general permit and that the statements made in this registration form are true, accurate and complete. Further, I agree to operate and maintain the facility described in this registration form so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the Department of Environmental Protection and revisions thereof.

I will promptly notify the Department of any changes to the information contained in this registration form.

Material Usage Rates

If this is an **initial registration** for a surface coating operation, provide an estimate of the average quantity of volatile organic compounds in all coatings (solvents and thinners) expected to be used on a daily basis.

Less than three pounds of VOC.

If this is a **re-registration** for an existing surface coating operation, provide the highest monthly average of the daily quantity of volatile organic compounds in all coatings (solvents and thinners) used in the last five years. Indicate the month and year during which this usage occurred.

Description of Facility

Below, or as an attachment to this form, provide a description of the surface coating operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

DRS Training & Control Systems is engaged in the fabrication, assembly, and QA/QC testing of various electronic components and products targeting & tracking systems. The North American Industry Classification System (NAICS) category of this facility is 334511, Search, Detection, navigation, Guidance, Aeronautical, and Nautical System Instrumentation Manufacturing. operation and support activities conducted at the facility include:

- Material Receiving & Shipping, Circuit Card Assembly, Electronic Assembly, Surface Coating (Spray Painting), Parts Marking, and Administrative Support Offices.

The surface coating activities generate regulated pollutants of volatile organic compounds (VOCs) and hazardous air pollutants (HAPs) and, as such, are regulated.

The surface coating operations is a single source emission and is typically used for touch-up operations, but as necessary, will be used to repaint small equipment.

The paint booth being installed is in accordance with OSHA and NFPA standards. Also, all processes will be in accordance with EPA NESHAP Subpart XXXXXX standards using 98% capture efficiency of regulated particulates. Also, High Pressure Low Velocity (HPLV) spray guns will be used for all coating operations. Concurrently, we are scheduling training for our painters in proper use of the HPLV spray gun, proper application of paint, and cleaning techniques.

A newly implemented Access program will automatically calculate the emission rate of VOCs and HAPs derived from the painters logs and will be maintained for 5 years.

Our new process/equipment hazard assessment form is utilized to identify any new equipment or process changes within the company.
