CONCRETE BATCHING PLANT
AIR GENERAL PERMIT REGISTRATION FORM

OCT 17 2011

DIVISION OF AIR
RESOURCE MANAGEMENT

Part II. Notification to Permitting Office

(Detach and submit to appropriate permitting office; keep copy onsite)

Instructions: To give notice to the Department of an eligible facility's intent to use this air general permit, the owner or operator of the facility must detach and complete this part of the Air General Permit Registration Form and submit it to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Please type or print clearly all information, and enclose the appropriate air general permit registration processing fee pursuant to Rule 62-4.050, F.A.C. (\$100 as of the effective date of this form)

0950148-005

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

- All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): _____
- No air operation permits currently exist for this facility.

General Facility Information

Facility Owner/Company Name (Name of corporation, agency, or individual owner who or which owns, leases, operates, controls, or supervises the facility.)

Preferred Materials, Inc.

Site Name (Name, if any, of the facility site; e.g., Plant A, Metropolis Plant, etc. If more than one facility is owned, a registration form must be completed for each.)

East Orlando Ready-Mix Plant, Facility ID 0950148

Facility Location (Provide the physical location of the facility, not necessarily the mailing address.)

Street Address: 7400 Narcoossee Road

City: Orlando

County: Orange

Zip Code: 32822 - 5586

Facility Start-Up Date (Estimated start-up date of proposed new facility.) (N/A for existing facility)

Owner/Authorized Representative

Name and Position Title (Person who, by signing this form below, certifies that the facility is eligible to use this air general permit.)

Print Name and Title: Darryl Fales, President

Owner/Authorized Representative Mailing Address

Organization/Firm: Preferred Materials, Inc.

Street Address: 25061 Old US 41 South

Telephone: 239-992-1400

Fax: 239-495-7527

Cell phone (optional): *tdipietro@preferredmaterials.com*

Facility Contact (If different from Owner/Authorized Representative)

Name and Position Title (Plant manager or person to be contacted regarding day-to-day operations at the facility.)

Print Name and Title: Brian Morton, Regional Operations Manager - Central Florida

Facility Contact Mailing Address

Organization/Firm: Preferred Materials, Inc.

Street Address: 11913 SR 54

City: Odessa

County:

Zip Code: 33556

Facility Contact Telephone Numbers

Telephone: 800-331-3375

Fax: 727-372-1291

Cell phone (optional):

Owner/Authorized Representative Statement

This statement must be signed and dated by the person named above as owner or authorized representative

I, the undersigned, am the owner or authorized representative of the owner or operator of the facility addressed in this Air General Permit Registration Form. I hereby certify, based on information and belief formed after reasonable inquiry, that the facility addressed in this registration form is eligible for use of this air general permit and that the statements made in this registration form are true, accurate and complete. Further, I agree to operate and maintain the facility described in this registration form so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the Department of Environmental Protection and revisions thereof.

I will promptly notify the Department of any changes to the information contained in this registration form.

Pave Parking Areas

Pave Yards

Maintain Roads/Parking/Yards

Use Water Application

Use Dust Suppressant

Remove Particulate Matter

Reduce Stock Pile Height

Install Wind Breaks

Check all precautions to be used for the management of drop points to trucks:

Spray Bar

Chute

Enclosure

Partial enclosure

Description of Reasonable Precautions

Below, or as an attachment to this form, provide details of all types of reasonable precautions to be used to prevent unconfined emissions at the facility.

Reasonable precautions are taken to control unconfined emissions from hoppers, storage and conveying equipment, conveyor drop points, truck loading and unloading, roads, parking areas, stock piles and yards as required by Rule 62-296.320(4)9c), FAC. The following precautions are taken at the facility.

Regular sweeping and/or application of water to control airborne emissions in the yard.

Regular removal of particulate matter from roads and paved work areas to minimize airborne particulate emissions.

Material stock piles are continuously sprayed to mitigate wind entrainment of particulate matter.

Material stock pile heights are minimized.

The loadout area is partially enclosed with a shroud to prevent emissions at the drop point into the truck.

Description of Facility

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

The ready-mix facility consists of a an office, aggregate storage piles, batch plant, 3 storage silos and associated conveying equipment.

EU 001

The facility uses a central dust collector to control particulate matter emissions from the three storage silos and batching operations. The central dust collector is a Griffin Model D80TR.

RE: Updated Air General Permit Registration Form
Preferred Materials, Inc. – East Orlando (Facility #095148)

Mr. Dibble,

Enclosed in this submission is an updated Concrete Batching Plant Air General Registration Form and associated fee for the Preferred Materials, Inc. (PMI) facility referenced above.

The registration contained within this submission has been updated to accurately reflect the current control equipment that is installed and operating at the facility. The facility has one central dust collector to control particulate matter emissions from the three storage silos and batching operations.

It appears the current registration on file with FDEP is incorrect because the previous owners, CEMEX Construction Materials, originally reported to FDEP on April 5, 2007, that three C&W CP305 baghouses were to be installed. To our knowledge the baghouses were never installed at the facility.

Please contact me at Erin.Zimmet@oldcastlematerials.com or 386-257-5504 with any questions regarding this submission.

Thank you,

Erin Zimmet
Environmental Manager

Re: CEMEX Construction Materials, L.P.
East Orlando Ready-Mix Plant
Air General Permit Notification Form

Dear Mr. Rustin:

This is to provide notice that we are upgrading the dust collection system at this facility. Each silo will be equipped with a C&W CP305 baghouse and the central dust collector will be used solely for the truck load out area.

Enclosed please find the Air General Permit Notification Form, Part II for the above-captioned plant, along with appropriate processing fee. Upon installation of the new baghouses, a VE test for each emission unit will be conducted within 30 days.

Please do not hesitate to call if you have any questions on this matter.

Sincerely,

Sigurd Bo
Regional Environmental Manager
East Central Florida

CONCRETE BATCHING PLANT

AIR GENERAL PERMIT REGISTRATION FORM

DIVISION OF AIR
RESOURCE MANAGEMENT

Part I. Procedures and Conditions for Use of Air General Permit

The Department of Environmental Protection ("Department" or "DEP") has established an "air general permit" at Florida Administrative Code ("F.A.C.") Rule 62-210.310(5)(b) for concrete batching plants. An air general permit is an authorization by rule to construct or operate a specific type of air pollutant emitting facility. Use of such authorization by any individual facility does not require action by the Department. The terms and conditions of the air general permit are set forth in the rule, rather than in a separately issued air construction or air operation permit.

The owner or operator of an eligible facility comprising one or more concrete batching plants may register to use the air general permit at Rule 62-210.310(5)(b), F.A.C., by following the general procedures given at Rule 62-210.310(2), F.A.C., the text of which is provided below. The owner or operator shall notify the Department of the facility's intent to use this general permit by submitting Part II of this registration form to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Questions concerning this air general permit or the registration process may be directed to any such office or to the Department's small business assistance program at 1-800-SBAP-HLP (1-800-722-7457).

The owner or operator of a facility who properly registers to use this air general permit, and who is not denied use of the air general permit by the Department, is authorized to construct and operate the facility in accordance with the general terms and conditions of Rule 62-210.310(3), F.A.C., and the specific terms and conditions of Rule 62-210.310(5)(b), F.A.C. The text of these two rules is also provided below, followed by definitions of words and phrases used in the rules and on this form. A facility using this air general permit shall not be entitled to use more than one air general permit for the facility.

Rule 62-210.310(2), F.A.C.

(2) General Procedures. This subsection sets forth general procedures for use of any of the air general permits provided at subsections 62-210.310(4) and (5), F.A.C.

(a) Determination of Eligibility. The owner or operator of a proposed new or existing facility shall determine the facility's eligibility to use an air general permit under this rule. A facility is eligible to use an air general permit under this rule if it meets any specific eligibility criteria given in the applicable air general permit at subsection 62-210.310(4) or (5), F.A.C., and the following general criteria.

1. The facility shall not emit nor have the potential to emit 10 tons per year or more of any hazardous air pollutant, 25 tons per year or more of any combination of hazardous air pollutants, or 100 tons per year or more of any other regulated air pollutant; be collocated with, or relocated to, such a facility; or create such a facility in combination with any other collocated facilities, emissions units, or pollutant-emitting activities, including any such facility, emissions unit, or activity that is otherwise exempt from air permitting.

2. The facility shall not contain any emissions units or activities not covered by the applicable air general permit, except:

a. Units and activities that are exempt from permitting pursuant to subsection 62-210.300(3), F.A.C., or Rule 62-4.040, F.A.C.; and

b. Units and activities that are authorized by another air general permit where such other air general permit and the air general permit of interest specifically allow the use of one another at the same facility.
