Re: CEMEX Construction Materials Florida, L.L.C.
Winter Garden Ready-Mix Plant
Permit # 0951180-006-AG

Dear Mr. Dibble:

CEMEX requests that a correction be made in the ARMS database, so that the emissions control equipment onsite is accounted for accurately.

A renewal application was submitted in January 2008 to upgrade the load out (EU-04) dust collector to a CP900. Soon, the plant closed and the existing equipment was never upgraded.

Since that time maintenance work was completed on the existing equipment to allow it to operate in a more efficient and compliant manner. Because of this as well as the lack of business it was decided to leave the existing equipment (Griffin Model V80 dust collector) in place.

Please do not hesitate to call me at 407-312-7119, if you have any questions on this matter.

Sincerely,

Sigurd Bo
Environmental Manager
North Materials Division

Mr. Bo,

Per your letter dated May 10, 2010, the emission unit 004 has been changed to reflect that the Griffin Model V80 has been improved and still in place and that the C&W, CP900 was never installed.

Thank you and have a great day!

Sincerely,

Dickson E. Dibble

Dear Sig,

The consensus here is that no re-registration or NOI is required, since we will consider this event or non-event as an Administrative Change.

However, for the record, a letter explaining 1) the situation and 2) requesting that we adjust our database to reflect the correct installed equipment would be in order.

If you have any questions, comments, or concerns please e-mail or call.

I hope this helps.

Have a great day!

Sincerely yours,

Dick

Mr. Dibble,

We had sent in a renewal application in January 2008 to upgrade the loud out (EU-04) dust collector to a CP900. Soon after the plant closed and the current equipment was not upgraded. I want to reflect that in the permit, do I need to send in a new NOI changing the description of the load out dust collector back to the Griffen Model V80 dust collector.

Thank You,

Sig Bo
