**SURFACE COATING OPERATIONS
AIR GENERAL PERMIT REGISTRATION FORM**

Bureau of Air Management
& Mobile Sources

Part II. Notification to Permitting Office

(Detach and submit to appropriate permitting office; keep copy onsite)

Instructions: To give notice to the Department of an eligible facility's intent to use this air general permit, the owner or operator of the facility must detach and complete this part of the Air General Permit Registration Form and submit it to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Please type or print clearly all information, and enclose the appropriate air general permit registration processing fee pursuant to Rule 62-4.050, F.A.C. (\$100 as of the effective date of this form)

0951331-001

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

- All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): _____
- No air operation permits currently exist for this facility.

General Facility Information

Facility Owner/Company Name (Name of corporation, agency, or individual owner who or which owns, leases, operates, controls, or supervises the facility.)

CHEP USA

Site Name (Name, if any, of the facility site; e.g., Plant A, Metropolis Plant, etc. If more than one facility is owned, a registration form must be completed for each.)

CHEP USA - Orlando Plant

Facility Location (Provide the physical location of the facility, not necessarily the mailing address.)

Street Address: 7315 Kingspointe Parkway #200

City: Orlando

County: Orange

Zip Code: 32819-6537

Facility Start-Up Date (Estimated start-up date of proposed new facility.)(N/A for existing facility)

Owner/Authorized Representative Statement

This statement must be signed and dated by the person named above as owner or authorized representative

I, the undersigned, am the owner or authorized representative of the owner or operator of the facility addressed in this Air General Permit Registration Form. I hereby certify, based on information and belief formed after reasonable inquiry, that the facility addressed in this registration form is eligible for use of this air general permit and that the statements made in this registration form are true, accurate and complete. Further, I agree to operate and maintain the facility described in this registration form so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the Department of Environmental Protection and revisions thereof.

I will promptly notify the Department of any changes to the information contained in this registration form.

Material Usage Rates

If this is an **initial registration** for a surface coating operation, provide an estimate of the average quantity of volatile organic compounds in all coatings (solvents and thinners) expected to be used on a daily basis.

25 lbs/day (average of 20 lb/day in 2008 and 23 lb/day in 2009)

If this is a **re-registration** for an existing surface coating operation, provide the highest monthly average of the daily quantity of volatile organic compounds in all coatings (solvents and thinners) used in the last five years. Indicate the month and year during which this usage occurred.

Description of Facility

Below, or as an attachment to this form, provide a description of the surface coating operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

Surface Coating Operations

Surface coating operations at the Orlando facility are conducted using an automated booth for painting and stenciling. The sides and tops of CHEP wood pallets are painted blue. The CHEP logo is painted white on the side of the pallet using a stencil. VOC emissions from surface coating operations are based on VOC content of the coatings utilized onsite. Particulate emissions from coating operations are minimized through the use of particulate filters in the spray booth.

Based on site-specific information, the VOC content for the coatings utilized at the facility are as follows:

Blue (True Value / GPM): 0.9 lb VOC/gallon as received (diluted 4 parts water/1 part paint for use)

White (True Value / VF-11): 0.42 lb VOC/Galloon received

Pallet Repair Operations

Damaged pallets are sent to one of multiple pallet repair stations where damaged wood components are removed and replaced with new pre-cut components prior to surface coating operations. Damaged components are discarded into containers. Repair activities consist of cutting, nailing and grinding operations. The cutting and grinding operations are potential sources of particulate emissions which are vented indoors. Pallet repair operations do not qualify for a categorical exemption from air permitting, but do qualify for a generic exemption provided potential particulate matter emissions do not exceed 5.0 tons/year.

Wood Chipping Operations

Damaged wood components are fed into a wood chipper prior to off-site shipment. Wood chipping operations are conducted outdoors and are not equipped with an air pollution control device to minimize particulate emissions.
