

**CONCRETE BATCHING PLANT
AIR GENERAL PERMIT REGISTRATION FORM**

Part II. Notification to Permitting Office

(Detach and submit to appropriate permitting office; keep copy onsite)

Instructions: To give notice to the Department of an eligible facility's intent to use this air general permit, the owner or operator of the facility must detach and complete this part of the Air General Permit Registration Form and submit it to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Please type or print clearly all information, and enclose the appropriate air general permit registration processing fee pursuant to Rule 62-4.050, F.A.C. (\$100 as of the effective date of this form)

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
 Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
 Continue operating the facility after a change of ownership.
 Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

- All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): _____
 No air operation permits currently exist for this facility.

General Facility Information

Facility Owner/Company Name (Name of corporation, agency, or individual owner who or which owns, leases, operates, controls, or supervises the facility.)

Herbert H. Romancky / Suncoast Concrete, LLC

Site Name (Name, if any, of the facility site; e.g., Plant A, Metropolis Plant, etc. If more than one facility is owned, a registration form must be completed for each.)

Spring Hill Plant

Facility Location (Provide the physical location of the facility, not necessarily the mailing address.)

Street Address: **On Hudson Avenue, 1/10th Mile East of Hudson Av., and Hayco Rd., intersection**

City: **Spring Hill**

County: **Pasco**

Zip Code: **34610**

Facility Start-Up Date (Estimated start-up date of proposed new facility.) (N/A for existing facility)

Owner/Authorized Representative Statement

This statement must be signed and dated by the person named above as owner or authorized representative

I, the undersigned, am the owner or authorized representative of the owner or operator of the facility addressed in this Air General Permit Registration Form. I hereby certify, based on information and belief formed after reasonable inquiry, that the facility addressed in this registration form is eligible for use of this air general permit and that the statements made in this registration form are true, accurate and complete. Further, I agree to operate and maintain the facility described in this registration form so as to comply with all applicable standards for control of air pollutant emissions found in the statutes of the State of Florida and rules of the Department of Environmental Protection and revisions thereof.

I will promptly notify the Department of any changes to the information contained in this registration form.

Type of Facility

Check one:

Stationary Facility

Relocatable Facility

Type(s) of Reasonable Precautions Used to Prevent Unconfined Emissions

Check all precautions to be used for the management of roads, parking areas, stock piles and yards:

Pave Roads

Pave Parking Areas

Pave Yards

Maintain Roads/Parking/Yards

Use Water Application

Use Dust Suppressant

Remove Particulate Matter

Reduce Stock Pile Height

Install Wind Breaks

Check all precautions to be used for the management of drop points to trucks:

Spray Bar

Chute

Enclosure

Partial enclosure

Description of Reasonable Precautions

Below, or as an attachment to this form, provide details of all types of reasonable precautions to be used to prevent unconfined emissions at the facility.

Reasonable precautions are the practicably applicable portions of 62-296.414 and include but are not limited to the following:

- Paving and maintenance of roads, parking areas, and yards as deemed necessary by owner.**
- Application of water if and where necessary to control emissions on any stockpiles and other sources of particulate emissions.**
- Enclosure or covering of conveyor systems and drop points as per manufacturer's specifications and requirements.**
- Curtailing of operation if winds are entraining particulate matter.**

Description of Facility

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

This re-registration is for the addition of a 75 ton (75cubic yard) flyash silo to the facility. The emissions from filling of the silo are controlled by a vent filter system rate at approximately 400 acfm and an approximate cloth area of 63 square.

The remainder of the facility remains as previously permitted in 2007 and consists of Concrete Batch plant rated at 365 tons per hour of batch mix product and a Block Machine rated at 30 tons per hour of cement block product.

The concrete batch plant consists of a 60 cubic yard aggregate bin, 12 cubic yard aggregate and cement batchers, all necessary conveyors, chutes and a two compartment silo to hold fly ash and cement. The existing silo capacity is 138 tons, apportioned into 2/3rd cement and 1/3rd fly ash. The emissions during loading of the new 75 ton fly ash silo are controlled by a filter dust collector on top of the silo. Emissions from the existing split silo are controlled by a C&W reverse pulse jet Central Dust Collection system.

The cement block section of the facility consists of a Besser V3-12 plant with 80 cubic feet mixer, automatic cuber, cement batcher, conveyors, other related equipment and a 50 ton cement silo, with a Dusty Dustless Griffin Filters Model 18VDS-DH batcher vent filter system.

A drawing of the new flyash silo is included in this registration.
