Good Morning Mr. Dibble,

Air Quality determined the facility was still closed and locked on 1/5/09. The dry-dry machine was observed to be in the back of the facility and it was not clear whether it was connected to a power source. Telephone calls were placed to the RO, but no answer. Another follow-up inspection is planned in a couple of months.

If you have any further questions, please contact our office.

Thanks,

Jeff
