NONMETALLIC MINERAL PROCESSING PLANT (CRUSHER)
AIR GENERAL PERMIT EXAMPLE REGISTRATION WORKSHEET

APR 27 2012

DIVISION OF AIR
RESOURCE MANAGEMENT

Facility Identification Number - If known (seven digit number)

1050405

1050405-002

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing permitted facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit). If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. (See "Surrender of Existing Air Operation Permit(s)" below.)
- Operates an existing facility not currently permitted or using an air general permit.

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C.
- Any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only, if Applicable

All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s):

General Facility Information

Facility Owner/Company Name (Name of corporation, agency, or individual owner who or which owns, leases, operates, controls, or supervises the facility.)
Hanson Hardscape Products, LLC.

Site Name (Name, if any, of the facility site; e.g., Plant A, Metropolis Plant, etc. If more than one facility is owned, a complete registration must be submitted for each.)
Hanson Hardscape Products - Haines City

Facility Location (Physical location of the facility, not necessarily the mailing address.)

Street Address: 1980 Marley Drive

City: Haines City

County: Polk

Zip Code: 33844

-9202

Facility Start-Up Date (Estimated start-up date of proposed new facility.)(N/A for existing facility.)

Description of Facility

Below, or as an attachment to this worksheet, provide a description of the nonmetallic mineral processing plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe material(s) processed, all air pollutant-emitting processes, and identify any air pollution control measures used. Mobile source equipment information is not needed (eg.: trucks, bulldozers, front-end loaders, etc.)

This is an application to operate an EZ Screen 1200XL at the Hanson Hardscape Products, LLC. Haines City Facility, the screen will be permanently located at the Haines City Facility.

The EZ Screen 1200 XL has a 5' by 6' wide double deck screen box with end tensioned screens, utilizing a 10 hp Yanmar air cooled diesel engine. The hydraulically driven 24" wide conveyor has an 8'11" dump height. The EZ Screen XL has the capacity to screen 600 tons per day.

The EZ Screen XL will be operated in a stand-alone configuration to screen production waste to be recycled as aggregate, and in conjunction with a relocatable Rubble Master RM70 Crusher processing production waste to be recycled as aggregate.

Helpful Definitions:

"Capacity" – Per 40 CFR 60.671, the cumulative rated capacity of all initial crushers that are part of the plant.

"Department" or "DEP" - The State of Florida Department of Environmental Protection.

"Emissions Unit" - Any part or activity of a facility that emits or has the potential to emit any air pollutant.

"Facility" - All of the emissions units which are located on one or more contiguous or adjacent properties, and which are under the control of the same person (or persons under common control).

"Owner" or "Operator" - Any person or entity who or which owns, leases, operates, controls or supervises an emissions unit or facility.

"Nonmetallic Mineral Processing Plant" – Per 40 CFR 60.671, any combination of equipment that is used to crush or grind any nonmetallic mineral wherever located, including lime plants, power plants, steel mills, asphalt concrete plants, portland cement plants or any other facility processing nonmetallic minerals except as provided in 40 CFR §60.670 (b) and (c).

"Relocatable Facility" - A facility such as, but not limited to, an asphalt plant, portable power generator, or relocatable nonmetallic mineral processing plant, which is designed to be physically moved to, and operated on, different sites by being wholly or partially dismantled and re-erected in essentially the same configuration. It shall not be operable while in transit.

"Screening Operation" – Per 40 CFR 60.671, a device for separating material according to size by passing undersize material through one or more mesh surfaces (screens) in series and retaining oversize material on the mesh surfaces (screens). Grizzly feeders associated with truck dumping static (non-moving) grizzlies used anywhere in the nonmetallic mineral processing plant are not considered to be screening operations.

"Size" – Per 40 CFR 60.671, the rated capacity in tons per hour of a crusher, grinding mill, bucket elevator, bagging operation, or enclosed truck or railcar loading station; the total surface area of the top screen of a screening operation; the width of a conveyor belt; and the rated capacity in tons of a storage bin.

"Unconfined Emissions" - Emissions which escape and become airborne from unenclosed operations or which are emitted into the atmosphere without being conducted through a stack.

**THE EZ WAY TO
DOUBLE PRODUCTION...**

**WITHOUT ADDING
ANOTHER LOADER!**

Ordinary box screeners can't work as hard as the **EZ Screen 1200**, unless they're teamed with two loaders. The secret's the **EZ Screen 1200's** built-in conveyor system.

With a typical box screener, the loader operator has two jobs. Job one is keeping the screener filled with material. Job two is using the loader to scoop fines out of the machine and move them to the stockpile.

With the **EZ Screen 1200** on the site, the loader operator has just one job: loading the screener. The other job, moving fines, is handled by the 24" - wide conveyor that's able to stockpile material 8' high or into a truck.

New screener math: productivity is doubled. In fact, yield is now dependent only on the efficiency of the loading operation. No more wasted time running the screener without material, thereby maximizing production.

Increased efficiency is only half the productivity equation. The other half is dependability. Which is why the **EZ Screen 1200** is built with the highest-quality components. Like its never-say-die, air-cooled diesel engine. It sips fuel, so it'll run long and hard without refueling.

The **EZ Screen 1200**. The **EZ way** to double your production.

Is the **EZ Screen 1200** right for your applications? Ask us, it's all part of our total commitment to customer service.

- Weight - 7940 lbs.
- Tongue weight - 1630 lbs.
- Overall length - 29'
- Overall width - 5'-7"
- Overall height - 9'-11"

The **EZ Screen 1200** is a product of Argus Industrial Co., manufacturer of the **EZ Screen** range of screening plants - all offering innovation, productivity, versatility and value through patented designs, exclusive features, quality manufacturing and outstanding customer service.

Argus Industrial Co., L.L.C. has a policy of continuous product improvements and reserves the right to change specifications, designs or prices anytime without notice or the incurring of any obligations.

- FEATURES -

- Loading bucket size range: ½ to 1¾ yards with a 8' feed height
- Air-cooled diesel, 10-HP with low oil and high temperature shut down.
- An hour meter and electric starting system is standard
- Exide "Spiral Wound" battery for long life in a vibratory environment
- Dual stage air filter system
- Fully enclosed, lockable engine compartment and starter panel
- Patented non-hydraulic screen drive
- Hydraulically driven 24" wide vulcanized "Endless" conveyor with 8' dump height
- Hydraulic drive components are by Eaton and Char-Lynn
- Conveyor components are U.S. made CEMA "B" grade
- All EZ-Screen surfaces are a baked powder coat finish
- Custom made sealed wiring harness with lights for street legal towing
- Tow hitch has safety chains, automatic safety break-away controller with battery
- Hydraulic raising and lowering tongue with 3" pintle eye/lunette ring
- 7,000 lb. capacity E-Z lube axle on rear with hydraulic activated rear pivoting assembly
- Electric brakes, 235/85R16 Load range "E" 10 ply trailer tires plus detachable mud-flaps.

*To insure safe towing, always be certain that the tow vehicle is properly equipped.

**RE: Hanson Hardscape Products, LLC. – Haines City
Air General Permit Registration: ARMS ID: 1050405**

To whom it may concern:

Hanson Hardscape Products, LLC. (Hanson) is submitting this Nonmetallic Mineral Processing Plants air general permit registration for re-registration of the above referenced facility.

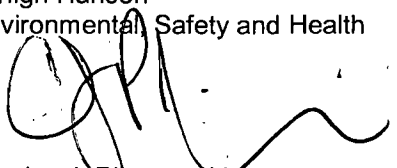

Hanson has enclosed the NONMETALLIC MINERAL PROCESSING PLANT (CRUSHER) AIR GENERAL PERMIT EXAMPLE REGISTRATION WORKSHEET for the re-registration of this existing facility and has enclosed the required \$100 air general permit registration processing fee per Rule 62-4.050(4)(p)(2), F.A.C. for the facility.

ARMS ID: 1050405 Check Number: 40148693

If you have any questions or comments, please do not hesitate to contact me at (386) 734-6228.

Sincerely,

Lehigh Hanson
