* If there are multiple pieces of the same types of process equipment (more than one silo, etc), provide an identifier (location, numeric designation, capacity or product) specific to each piece of equipment.

Description of Facility

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe type of concrete product(s) manufactured, all air pollutant-emitting processes, and identify any air pollution control measures used. Mobile source equipment information is not needed (eg.: trucks, bulldozers, front-end loaders, etc.)

The facility consists of an office, aggregate storage areas, batch plant, storage silos, aggregate material conveying equipment and concrete mixing trucks.

The plant is installing a new central dust collector to control emissions from the north silo, south silo, weigh hopper and truck loadout. The central dust collector is a C&W BP 1300 bag-type baghouse.
