Mr. Wiecek,

Our office received notification this week stating that the Independence Recycling, Inc. portable crushing unit covered by the subject FDEP Air General permit is currently inoperable due to repair work & has not operated during CY 2011.

Therefore, the annual RM9 visible emissions (VE) compliance test of this unit will not be required for CY 2011. We will update our records & FDEP's ARMS database to reflect the current shutdown status.

Please be advised that a VE compliance test must be scheduled with the governing office & conducted within 30 days of once again operating this unit in the state of Florida.

Let me know if you have any questions.

Thanks,
Wayne Walker

Lori,

On behalf of Independence Recycling, Inc., this is to notify you the referenced crusher has been outside the state of Florida, is inoperable, and has not operated in 2011, and therefore there will not be any visible emission (VE) tests for this crusher for 2011. The crusher is being reconditioned and when it returns to Florida, it will be VE tested.

Please note this facility as being in "Long Term Reserve Shutdown" (LTRS) for 2011.

Also, please confirm it will not be "flagged" for "missing VE tests" for 2011.

Mr. Ray Wiecek is the company contact for the crusher. His contact info is:

Good morning Lynn!

Page 4, Description of Facility was missing (not included) with your submittal and I need it before I can complete my review. This is the unit that is in Long Term Reserve Shutdown (LTRS) and is GA for repairs.

I need to know the process and what is processed when this thing is operating in Florida.

I'm in a crunch for time because of heavy workload and I need this information, as we would say "yesterday".

If you can shoot me an e-mail today with the information, I will add it as an addendum to the registration.

Thank you for your immediate attention to this request.

Have a great day!

Dick
