CONCRETE BATCHING PLANTS
AIR GENERAL PERMIT EXAMPLE REGISTRATION WORKSHEET

Facility Identification Number - If known (seven digit number)

7775394

7775394-002

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing permitted facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit). If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. (See "Surrender of Existing Air Operation Permit(s)" below.)
- Operates an existing facility not currently permitted or using an air general permit.

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C.
- Any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only, if Applicable

All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s):

General Facility Information

Facility Owner/Company Name (Name of corporation, agency, or individual owner who or which owns, leases, operates, controls, or supervises the facility.)

Remedial Equipment Services, LLC

Site Name (Name, if any, of the facility site; e.g., Plant A, Metropolis Plant, etc. If more than one facility is owned, a complete registration must be submitted for each.)

Flowable Fill Plant

Facility Location (Physical location of the facility, not necessarily the mailing address.)

Street Address: Currently at : I-10 & Highway 53

City: Madison

County: Madison

Zip Code: 32340

Facility Start-Up Date (Estimated start-up date of proposed new facility.)(N/A for existing facility.)

Facility Contact

Name and Position Title (Plant manager or person to be contacted regarding day-to-day operations at the facility.)

Print Name and Title: Robert Leger

Facility Contact Telephone Numbers

Telephone: (850) 385-5872

Fax: (850) 385-5874

Cell phone: (850) 519-7540

E-mail: bobby@fortisenvironmental.com

Facility Contact Mailing Address

Organization/Firm: Fortis Environmental Group, LLC

Mailing Address: PO Box 12998

City: Tallahassee

County: Leon

Zip Code: 32317

Other Contact/Representative (to serve as additional Department contact)

Name and Position Title

Print Name and Title: Dusty Anderson, Construction Manager

Other Contact/Representative Telephone Numbers

Telephone: (850) 385-5872

Fax: (850) 385-5874

Cell phone: (850) 933-1497

E-mail: dustyanderson@vzw.blackberry.net

Other Contact/Representative Mailing Address

Organization/Firm: Tri-Con, Inc.

Mailing Address: PO Box 12847

City: Tallahassee

County: Leon

Zip Code: 32317

Type of Facility

Check one:

Stationary Facility Relocatable Facility

Type(s) of Reasonable Precautions Used to Prevent Unconfined Emissions

Check all precautions to be used for the management of roads, parking areas, stock piles and yards:

Pave Roads Pave Parking Areas Pave Yards
 Maintain Roads/Parking/Yards Use Water Application Use Dust Suppressant
 Remove Particulate Matter Reduce Stock Pile Height Install Wind Breaks

Check all precautions to be used for the management of drop points to trucks:

Spray Bar Chute Enclosure
 Partial enclosure

Equipment Details Provide information for each silo, weigh hopper (batcher), and other enclosed storage and conveying equipment that are limited to a visible emissions of 5 percent opacity pursuant to Rule 62-296.414(1), F.A.C.

PROCESS EQUIPMENT TYPE (silo, weigh hopper, batcher, etc.)	PROCESS EQUIPMENT IDENTIFICATION*	CONTROL DEVICE (baghouse, vent filter, etc.)	CONTROL DEVICE MANUFACTURER	CONTROL DEVICE MODEL NUMBER
cement silo		36" Boot & Dust Collector	Wameco dust collector	Front 0703

* If there are multiple pieces of the same types of process equipment (more than one silo, etc), provide an identifier (location, numeric designation, capacity or product) specific to each piece of equipment.

Description of Facility

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe type of concrete product(s) manufactured, all air pollutant-emitting processes, and identify any air pollution control measures used. Mobile source equipment information is not needed (eg.: trucks, bulldozers, front-end loaders, etc.)

Sand will be delivered on a dally basis to minimize sand pile height (~ less than 10 ft in height). In order to reduce emissions at the loading point, RES has replaced the factory cement delivery boot (16" long) at the loading point with a 36" long boot. The portable plant is equipped with a WAMECO dust collector to control dust during cement delivery activities.

FORTIS Environmental Group, LLC conducts petroleum contaminant source excavation for the FDEP Preapproval Cleanup Program using a foundation drilling rig equipped with a large diameter auger and the excavation area is being backfilled with excavable flowable fill (~125 psi concrete). Due to time efficiency and onsite safety concerns cause by the inefficient supply of flowable fill by local subcontractors in the area, the portable plant will be used to supply flowable fill to the aforementioned excavation jobs. The current project is anticipated to end approximately the first week of July 2012.

The flowable fill consists of 450 gallons of water, 110 pounds of cement, 2,500 pounds of sand and 6 ounces of air entrainment per cubic yard. Approximately 7,000 cubic yards of flowable fill at a rate of 100 cubic yards/day will be produced during the life of the current project. Sand pile height will be minimized by sand being delivered on a daily basis. Cement emissions will be minimized using the dust controller on the low profile cement silo and extended (36") cement delivery boot.

CONCRETE BATCHING PLANTS

Air General Permit Example Registration Worksheet FEB 21 2012

DIVISION OF AIR
RESOURCE MANAGEMENT

The Department of Environmental Protection has established an "air general permit" at Florida Administrative Code ("F.A.C.") Rule 62-210.310(5)(b) for concrete batching plant. An air general permit is an authorization by rule to construct or operate a specific type of air pollutant emitting facility. Use of such authorization by any individual facility does not require action by the Department. The terms and conditions of the air general permit are set forth in the rule, rather than in a separately issued air construction or air operation permit.

If you are the owner or operator of an eligible facility comprising one or more concrete batching plants, you may register to use the air general permit at Rule 62-210.310(5)(b), F.A.C., by following the general procedures given at subsections 62-210.310(2) and 62-210.310(3), F.A.C. To register, use the Department's electronic registration system (currently under development) or submit all the information specified in the above rules to either of the following addresses, along with the air general permit registration processing fee (\$100.00), payable to FDEP.

Regular USPS Mail Delivery

Department of Environmental Protection
Receipts
Post Office Box 3070
Tallahassee, Florida 32315-3070

or

Overnight Delivery (FedEx, UPS, DHL, etc.)

Department of Environmental Protection
3800 Commonwealth Blvd.
Mail Station 77
Tallahassee, Florida 32399

If you properly register to use an air general permit, and are not denied use of the air general permit by the Department, you are authorized to construct and operate the facility in accordance with the general terms and conditions of Rule 62-210.310, F.A.C., and the specific terms and conditions of Rule 62-210.310(5)(b), F.A.C. Your facility may vary, so be sure your registration describes the operations at your facility in sufficient detail to demonstrate the facility's eligibility for use of the air general permit and to provide a basis for tracking any future equipment or process changes. Your registration should describe all air pollutant-emitting processes and equipment at the facility, and it should identify any air pollution control measures or equipment used.

The rules do not require any specific format for the registration. This worksheet, however, has been designed to assist owners and operators. Using it as a template for a general permit registration will help ensure that all necessary information is submitted.

Additional information can be found on the Department's air general permit program website (http://www.floridadep.org/air/emission/air_gp.htm) or by calling the Small Business Environmental Assistance Program Hotline at 1-800-SBAP-HLP (1-800-722-7457).
