Good afternoon Max, Kathleen, & Pat!

Max,

As a follow-up, I wanted to let you know that I have done the following:

Facility ID# 7770086

1. De-linked the 04/30/12 payment #1146021 of \$100.00 to ARMS ID# 7770086-003-AG.
2. Since the facility, unbeknownst to us, had been sold and no longer under the ownership of Set Materials, I have changed the Facility Status to **INACTIVE** per your July 9th e-mail to Danielle.
3. Permit Application expiration date was updated (05/31/12) to reflect rescindment.

Enterprise application was integrated with ARMS

Pat & Kathleen,

As you may have already read, the de-linking and linking of payment from one to the other has already been accomplished and this entitlement #7775422-003-AG should become effective after tonight's ARMS run. I **do not** need to do a FINAL REVIEW on this one. As soon as you get the registration form you can go ahead and send an e-mail Letter of Acknowledgment to the facility and forward the registration on to Kathleen for final scan.

Kathleen,

You will probably need to perform records scan for both facilities to reflect the changes in both.

If anyone has any questions let me know. I will be more than happy to explain what we did.

Thank you and have a great day!

Regards,

Dick

Dick,

Can you tell me if everything is ok regarding this facility's re-registration? The paper work was forwarded to you on July 30 (see Danielle's email below—actually initially forwarded on July 9th). I told the facility AR that I would keep an eye on it, and we're now a week away from expiration of her current GP. Let me know if there's anything I can do to help.

Thanks,

Max Grondahl

Hi Danielle,

This should be sufficient. Dick will be back next Tuesday and will let you or the applicant know if he requires some additional documentation.

Syed

Good afternoon Syed,

This registration was actually already submitted with my original email sent to Dick (you were copied) on July 9, 2012. The facility id 7775422 is the facility Set materials would like to renew. I attached this registration form. Is this sufficient to proceed? I would also like to note that this facility's prior GP registration expires on August 23, 2012. Please let me know if this registration is sufficient to proceed.

Thank you,

Danielle,

Just to confirm what we had talked earlier, they can send the registration form to Dick Dibble for the crusher that has come due for renewal. They don't need to include a check with the registration form. We will on our end take care of transferring the \$100 that the facility has already paid to be applied for this registration.

Let me know if you have further questions.

Syed

Good morning Syed,

Do you have any thoughts on the request noted below? I haven't heard from Dick and just saw he will be out until August 7th. Since this was a request from industry I would like to respond as early as possible. The request came in on July 9th and I emailed the inquiry to Dick that same day. Your guidance is appreciated.

Thank you,

Good morning Dick,

I hope you enjoyed a nice weekend.

Wanted to ask you about the scenario addressed below to see if there is anything the Department can do to solve the facility error. I thought maybe you could do an administrative correction to fix the registrations. Since you handle the payment side I thought it best you handle the situation. If there is anything we can assist with on our end we'll be happy to, just let us know.

Warmest regards,

Subject: GP registration issue, Set Materials

Danielle,

Set Materials has two crushers registered with GPs. The facility IDs are 7770086 and 7775422. Both of these units were the same make and model (Eagle 1200). The serial number on 7770086 was 22204 and 7775422 is 306754. They no longer own the unit that was permitted under 7770086. However, when that unit came due for renewal, Lori Adams (the contact) submitted a new registration, thinking it was for the unit they do still own. Permit No. 7770086-002-AG was issued 5/31/2012.

Now, the unit they do still own (7775422/serial no. 306754) has come due for renewal. It wasn't until I called Lori last week to tell her the due date was coming up on 7775422 that she realized what happened. I've attached a registration that she sent to me where she corrected the fields from when she re-registered for 7770086. Is there anything that we can do to help correct the registration form—changing the renewal from 7770086 to 7775422, and letting 7770086 expire. Or will she have to submit a new registration form and pay the \$100 again? I was hoping to help her avoid that if possible.

Thanks,

Max Grondahl
