Carol, (Melton that is..)

This unit was permitted in the Tallahassee office, so I am forwarding copies of the file documents in the attached pdf file. All of the information should be accessible in ARMS. The only thing I hadn't done was to link the EU's to the permit, but it's done now.

Hope this helps...

Dick

Hi,

Please send the Air Resources Management – Northwest District copies of any files you may have for the Powerscreen Of Florida rock crusher facility, ARMS ID 7775477. The facility was originally located in the Southwest District, but has relocated to the Northwest District. They have submitted two facility relocation notification forms indicating the crusher is now in the Northwest District. Your assistance in this matter is much appreciated. Please let me know if you have any questions or need more information.

Thanks
