Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

- All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): _____
- No air operation permits currently exist for this facility.

Water will be used as a dust suppressant when necessary.

Description of Facility

Below, or as an attachment to this form, provide a description of the nonmetallic mineral processing operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

This application is for a Metso Model C105, Serial No. 72903 Non Metallic Mineral Crushing Machine. The machine has a rated capacity of 400 tph and utilizes three 39" spraybars. There is no integral screen on this machine, only a feeder grizzly. It is powered by a Caterpillar C-9 manufactured in October of 2005. There are two conveyor belts associated with this machine. The belts are manufactured by Metso, the main belt is 10' x 24", the side conveyor is 5' x 24". The machine will be used to process recycled materials, concrete, asphalt, assorted building materials, limestone, granite and other aggregate products.

To Whom It May Concern:

The attached request for application is for Southern Rock Busters. Their Metso LT105 Impact Crusher is located at our facility for repairs. Upon completion of the repairs the equipment may be rented to a facility in Florida. To prepare for this possibility we would like to request for permit application on the attached equipment.

If you have any questions, please do not hesitate to contact me.

Thank you for your attention to this matter.

Sincerely,

Cindy Reed
