Description of Reasonable Precautions

Below, or as an attachment to this form, provide details of all types of reasonable precautions to be used to prevent unconfined emissions at the facility.

Equipment is located at a mine or quarry and processes material from onsite natural deposits. The material is inherently at 8 to 12 % moisture when processed. As a result, dust suppression or spray bars at the crushing circuit not needed.

A water truck is used around the mine on all roads where truck traffic travels.

Description of Facility

Below, or as an attachment to this form, provide a description of the nonmetallic mineral processing operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

The purpose of this Nonmetallic Mineral Processing Plant Air General Permit Registration Form is to operate relocatable crusher facility owned by MFM Limestone, LLC.

The facility meets the Eligibility Requirements specified in Rule 62-210.310(2), F.A.C.

Please refer to Page 9 of the Nonmetallic Mineral Processing Plant Air General Permit Registration Form for air pollution control measures.

Please refer to Attachment 1 for Facility Equipment List.

The crusher engine is not an affected facility as defined in 40 CFR 60.670. Per Rule 62-210.310(5)(e), F.A.C., annual visible emissions testing is not required for this piece of equipment.
