Thank you Laura for your efforts and prompt reply.

Just as an FYI, the rules do not take into account production rates of various materials or the rate of production by any one facility. The rule is specific to the maximum machine rated capacity regardless of material production rates. That being the case, then the maximum machine rated capacity of the screen will also be 325 T/hr, not the 35 to 60 T/hr that he runs at.

If you have any questions, comments or concerns please e-mail or call.

Thank you and have a great day!

Dicks

Subject: Hardrives of Delray Additional Info.

Good Afternoon Dick,

Craig was unavailable, but Chris Sherlock, contact for Hardrives, was able to double verify the information. Additional contact information:

Cell phone: 561.441.8942

E-mail: cjs@hardrivespaving.com

He also verified that the screen is part of the crusher and NOT a separate piece of equipment; the SN/Model # are the same for the crusher/screen. He stated that although the crusher has a rated capacity of 325 TPH---he mostly runs smaller loads of 35-60 TPH- so basically he doesn't use it to full rated capacity. I have revised the AGP Registration Form to include the information referenced above. I hope this helps.

Attachments: image003.png; image004.jpg

Ryan,

It appears from the worksheet that this is a new facility, so as of this moment there is no Facility ID number. It will go to Object Code 002272 since it is an Air General Permit Registration.

Let me know if you need anything else.
