

Jeb Bush
Governor

Department of Environmental Protection

Twin Towers Office Building
2600 Blair Stone Road
Tallahassee, Florida 32399-2400

Colleen M. Castille
Secretary

April 14, 2004

Mr. Richard Zegelbone
Tropical Asphalt Products Corp.
1904 South 31st Avenue
Pembroke Park, Florida 33009

Re: Facility No.: 0112394-002

Dear Mr. Zegelbone:

The Department has received the Title V General Permit Notification Form for the asbestos manufacturing and fabrication facility that you submitted on March 11, 2004.

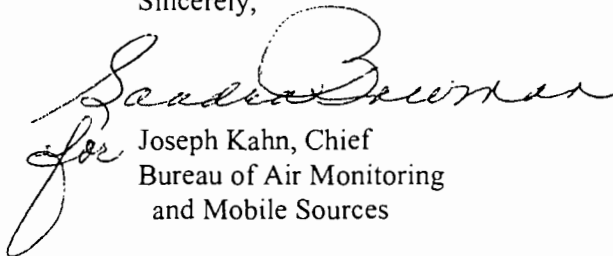

Please note that in January of each year the Department will be mailing fee notices to those facilities using the Title V general permit. This annual operation fee is \$50 and it is due and payable between January 15 and March 1 of each year the facility is in operation and is subject to the requirements of the Title V general permit.

If you have or expect to have any changes in your mailing address, location address, responsible official, or phone number, please notify the Department at the following address:

Title V General Permits Office
Bureau of Air Monitoring and Mobile Sources MS 5510
Department of Environmental Protection
2600 Blair Stone Road
Tallahassee, FL 32399-2400

If there are any changes in the facility status, including change of operating parameters or equipment, or if you have any additional questions regarding the Title V General Permit Program, please contact the district or local air program compliance inspector in your area.

Sincerely,

Joseph Kahn, Chief
Bureau of Air Monitoring
and Mobile Sources

DD/jw

Part III. Notification of Intent to Use General Permit

Prior to filling out this form, please read the instructions provided at the end of the form. Send completed form to the address listed in the instructions and keep a copy of the form for your files.

Facility Notification

1. Facility Owner/Company Name (Name of corporation, agency, or individual owner): Richard Zegelbone/Tropical Asphalt Products Corp.
2. Site Name (For example, plant name or number): Tropical Asphalt Products Corp
3. Hazardous Waste Generator Identification Number:
4. Facility Location: Street Address: 1904 South 31st Ave City: Pembroke Park County: Broward Zip Code: 33009
5. Facility Identification Number (DEP Use ONLY - do not fill in): 0112394-002

Responsible Official

6. Name and Title of Responsible Official: Name: Richard Zegelbone Title: President
7. Responsible Official Mailing Address: Organization/Firm: Tropical Asphalt Products Corp Street Address: 1904 South 31st Ave City: Pembroke Park County: Broward Zip Code: 33009
8. Responsible Official Telephone Number: Telephone: (954) 983-3434 Fax: (954) 963-2033

Facility Contact (If different from Responsible Official)

9. Name and Title of Facility Contact (For example, plant manager): Richard Zegelbone. President
10. Facility Contact Address: Street Address: SAME City: County: Zip Code:
11. Facility Contact Telephone Number: Telephone: (954) 983-3434 Fax: (954) 963-2033

Facility Information

Indicate with an "X" the classification of your facility.

- Asbestos Manufacturing
- Asbestos Fabrication

Equipment Monitoring and Recordkeeping Information

Check all logs which are required to be kept on-site in accordance with the requirements of this general permit:

- (a) Visible emissions monitoring
- (b) Equipment inspection log

Surrender of Existing DEP Air Permit(s)

Please indicate with an "X" the appropriate selection:

- I hereby surrender all existing DEP air permits authorizing operation of the facility indicated in this notification form; the permit number(s) are: _____
- No DEP air permits currently exist for the operation of the facility indicated in this notification form.

Responsible Official Certification

I, the undersigned, am the responsible official, as defined in Part II of this form, of the facility addressed in this notification. I hereby certify, based on information and belief formed after reasonable inquiry, that the statements made in this notification are true, accurate and complete. Further, I agree to operate and maintain the air pollutant emissions units and air pollution control equipment described above so as to comply with all terms and conditions of this general permit as set forth in Part II of this notification form.

I will promptly notify the Department of any changes to the information contained in this notification.

Richard Zegelbone

Instructions for Completing Part III of Notification Form

The Asbestos Manufacturing and Fabrication Facility Notification of Intent to Use General Permit, Part III of this form, shall be completed and submitted to the Division of Air Resources Management at least 30 days prior to beginning operations under the general permit. Please type or print clearly all information. A copy of this notification form shall be kept on-site and made available for review by Department personnel.

The responsible official of the facility, as defined in Part II of this notification form, is responsible for ensuring that the facility complies with all applicable terms and conditions of this general permit, as set forth in Part II of this form.

Mail the signed and completed Part III of this form to:

General Permits Section
Bureau of Air Monitoring and Mobile Sources, MS 5510
Department of Environmental Protection
2600 Blair Stone Road
Tallahassee, FL 32399-2400

Facility Name and Location

1. **Facility Owner/Company Name** - Enter the name of the corporation, agency, or individual that has ownership or control of the asbestos manufacturing or fabrication facility for which this notification is submitted.
2. **Site Name** - Enter the common name, if any, of the facility site; for example, Plant A, Metropolis plant, etc. If more than one facility is owned, a notification form must be completed for each.
3. **Hazardous Waste Generator Identification Number** - Enter the hazardous waste generator identification number, if known, assigned by the Department to the facility.
4. **Facility Location** - Enter the street address and zip code of the facility and the city and county in which it is located.
5. **Facility Identification Number (DEP Use ONLY)** - Please leave this space blank. DEP will enter the facility identification number assigned to you by ARMS.

Responsible Official

6. **Name and Title of Responsible Official** - Enter the name and title of the designated responsible official for the facility who, by signing this form, is certifying that the facility is eligible for a general permit pursuant to the requirements of Part II of this notification form and Rule 62-213.300, F.A.C.
7. **Responsible Official Mailing Address** - Enter the mailing address for the responsible official if different than the address entered in No. 4 above.
8. **Responsible Official Telephone Number** - Enter the telephone number and facsimile number, if available, at which the responsible official can be contacted.

Facility Contact

9. **Name and Title of Facility Contact** - Enter the name of the facility contact, if other than the responsible official. For example, a plant manager could be designated as the facility contact for Department inspections.
10. **Facility Contact Address** - Enter the mailing address for the facility contact, if different than the address entered in No. 4 above.
11. **Facility Contact Telephone Number** - Enter the telephone number and facsimile number, if available, at which this person can be contacted.

Facility Information

Indicate with an "X" whether your facility is classified as an asbestos manufacturing or fabrication facility.

Equipment Monitoring and Recordkeeping Information

Indicate all logs which are required to be kept on-site in accordance with the requirements of this notification form with an "X".

Surrender of Existing DEP Air Permit(s)

Rule 62-213.300(2)(a)2., F.A.C., makes the surrender of all existing DEP air permits authorizing the operation of a facility a condition precedent for the entitlement to a general permit. Indicate whether the responsible official surrenders such permit(s), listing the permit numbers, or whether no such permit(s) exist with an "X".

Responsible Official Certification

This statement must be both printed and signed by the person named on page 11, Field 6, of this form.

REFERENCE: Asbestos Manufacturing and Fabrication Facilities Air General Permit
TROPICAL ASPHALT PRODUCTS CORP, 1904 SO. 31ST Ave., Pembroke
Park, Florida 33009

As evidenced by the attached letter, we serve as environmental consultants to Tropical Asphalt Products Corp (TAPCO) and as such, have been authorized to sign environmental permits on behalf of Mr. Zegelbone, President. Consistent with our authority enclosed is the Asbestos Manufacturing and Fabrication Facilities Air General Permit notification for TAPCO. This application is to replace the General Air Permit that was inadvertently allowed to expire.

In submitting the application we have determined that the facility is eligible for the general permit since:

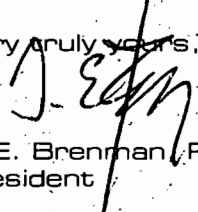

- 1.) The facility operates no significant emissions units other than the asbestos fabrication unit.
- 2.) The facility is a Title V source only by virtue of being subject to 40CFR Part 61, Subpart M,; but does not emit any pollutant in a major amount as set forth in paragraphs (a) through (e) of the definition of "major source of air pollution."
- 3.) The facility complies with all general conditions of Rule 62-213.300(3), F.A.C. set forth in Part II, and all requirements of 40 CFR Part 61, Subparts A and M, as applicable, also set forth in Part III of the Asbestos Manufacturing and Fabrication Facilities Air General Permit

In reviewing the application please be aware that although Tropical Asphalt has not manufactured products whose formulation including asbestos for the past three years, it is the client's desire to maintain their air emissions control system and the required General Permit. While the Air Emission permit expired, TAPCO has maintained the operating standards of the facility as if it had been manufacturing asbestos containing product. The annual emission test was conducted on November 18, 2003, a copy of the report was sent to Daniela Banu on November 24, 2003. The results of the latest test are consistent with those of the past, zero opacity was recorded. A copy has been attached to this letter.

We trust that this letter and the duly signed application are adequate to re-establish the TAPCO General Permit.

Please contact Jerry Brenman, P.E. should additional information be required.

Very truly yours,

J. E. Brenman, P.E.
President

**ASBESTOS MANUFACTURING AND FABRICATION FACILITIES
AIR GENERAL PERMIT NOTIFICATION FORM**

Part I. Procedures For Use of General Permit

- (1) Eligibility Determination.** The Department of Environmental Protection has established a Title V air general permit under Rule 62-213.300(1)(e), F.A.C., for asbestos manufacturing and fabrication facilities, the terms and conditions of which are listed in Part II of this Asbestos Manufacturing and Fabrication Facilities Air General Permit Notification Form. An asbestos manufacturing or fabrication facility may use this Title V air general permit provided the facility meets the eligibility criteria set forth in the rule and, throughout the term of the general permit, maintains its eligibility to use the general permit and complies with all terms and conditions of the general permit. The responsible official of the asbestos manufacturing or fabrication facility shall determine the facility's eligibility for the Title V air general permit and notify the Department of intent to use the general permit.
- (a) An asbestos manufacturing or fabrication facility is eligible to operate under the terms and conditions of the Title V air general permit established at Rule 62-213.300(1)(e), F.A.C., provided the responsible official has submitted a completed Part III of this notification form to the Department at least 30 days prior to beginning operations under the general permit and, throughout the term of the general permit, all of the following conditions are met:
1. The facility operates no emissions units other than asbestos manufacturing or fabrication units and emissions units which are considered insignificant pursuant to the criteria of Rule 62-213.300(2)(a)1, F.A.C., set forth in paragraph (1)(b).
 2. The facility is classified as a Title V source pursuant to paragraph (f), only, of the definition of "major source of air pollution" at Rule 62-210.200, F.A.C.; that is, the facility is a Title V source by virtue of being subject to 40 CFR Part 61, Subpart M; but does not emit any pollutant in a major amount as set forth in paragraphs (a) through (e) of the definition of "major source of air pollution"; and
 3. The facility complies with all general conditions of Rule 62-213.300(3), F.A.C., set forth in Part II, and all requirements of 40 CFR Part 61, Subparts A and M, as applicable, also set forth in Part II.
- (b) No facility which contains an emissions unit, other than an asbestos manufacturing and fabrication units or a unit considered insignificant pursuant to this paragraph, shall be eligible to use this air general permit. No facility is eligible to use more than one air general permit. An emissions unit or activity shall be considered insignificant if all of the following criteria are met:
1. The emissions unit or activity would be subject to no unit-specific applicable requirement.
 2. The emissions unit or activity would neither emit nor have the potential to emit:
 - a. 500 pounds per year or more of lead and lead compounds expressed as lead;
 - b. 1,000 pounds per year or more of any hazardous air pollutants;
 - c. 2,500 pounds per year or more of total hazardous air pollutants; or
 - d. 5.0 tons per year or more each of any other regulated pollutants.
 3. The emissions unit or activity, in combination with other units and activities at the facility, would neither cause the facility to emit nor have the potential to emit:
 - a. 100 tons per year or more of carbon monoxide, nitrogen oxides, particulate matter, sulfur dioxide, or volatile organic compounds;
 - b. 5 tons per year or more of lead and lead compounds expressed as lead;
 - c. 10 tons per year or more of any hazardous air pollutant;
 - d. 25 tons per year or more of total hazardous air pollutants; or
 - e. 100 tons per year or more of any other regulated pollutant.
- (c) Any facility that would use a Title V air general permit under Rule 62-213.300, F.A.C., must surrender all existing air permits authorizing the operation of the facility.
- (d) If a facility at any time becomes ineligible for the use of the Title V air general permit and is subject to the source-specific Title V air operation permit requirements of Chapter 62-213, F.A.C., it shall be subject to enforcement action for operating without an air operation permit.
- (e) Notwithstanding the shield provisions of Rule 62-213.460, F.A.C., any facility utilizing a Title V air general permit will be subject to enforcement action for operation without a permit under Chapter 62-213, F.A.C., if it is determined to be initially ineligible for the air general permit which is being utilized.
- (2) Notification.** For each facility intending to operate under the provisions of this Title V air general permit, the responsible official must complete and submit Part III of this Asbestos Manufacturing and Fabrication Facilities Air General Permit Notification Form (DEP Form No. 62-213.900(6)) to give notice to the Department of intent to use such permit.
- (3) Administrative Corrections.** Within 30 days of any changes requiring corrections to information contained in this notification form, the responsible official shall notify the Department in

writing. Such changes shall include:

- (a) Any change in name of the responsible official or facility address or phone number;
 - (b) A change in facility status requiring more frequent monitoring or reporting by the responsible official from that noted on the most recent notification form; and
 - (c) Any other similar minor administrative change at the facility.
- (4) **Violation of Permit.** This Title V air general permit is valid only for the specific activity indicated. Any deviation from the specified activity and the conditions for undertaking that activity is a violation of the permit. The responsible official is placed on notice that violation of the permit constitutes grounds for revocation and suspension pursuant to Rules 62-4.100 and 62-4.530(4), F.A.C., and initiation of enforcement action pursuant to s. 403.141 through 403.161, F.S. No revocation shall become effective except after notice is served by personal service, certified mail, or newspaper notice pursuant to Section 120.60(5), F.S., upon the person or persons named therein and a hearing held, if requested within the time specified in the notice. The notice shall specify the provision of the law or rule alleged to be violated, or the permit condition or Department order alleged to be violated, and the facts alleged to constitute a violation thereof.
- (5) **Nullification of Eligibility.** Eligibility for use of a Title V air general permit is automatically nullified by:
- (a) Submission of false or inaccurate information in the notification form for use of the Title V air general permit or in the required reports;
 - (b) Refusal of lawful inspection by Department staff;
 - (c) Failure to submit operational reports or other information required by the general permit; or
 - (d) Failure to timely pay the required annual emissions fee, penalty, or interest.
- (6) **Use of Permit.** Any facility eligible to operate under the terms of a Title V air general permit may use the permit 30 days after giving notice to the Department without any agency action.

ASBESTOS MANUFACTURING AND FABRICATION FACILITIES AIR GENERAL PERMIT NOTIFICATION FORM

Part II. Permit Terms and Conditions

(Keep this Part onsite for use by facility staff.)

- (1) **Applicability.** This part of the Asbestos Manufacturing and Fabrication Facilities Air General Permit Notification Form establishes the terms and conditions of this Title V air general permit. Throughout the term of this air general permit, the responsible official shall ensure that the facility maintains its eligibility to use the general permit and complies with all general conditions of Rule 62-213.300(3), F.A.C., set forth below, and all requirements of 40 CFR Part 61, Subparts A and M, as applicable to asbestos manufacturing and fabrication facilities as specified in subsections 61.144 and 61.147, and also set forth in this part of the notification form.
- (2) **General Conditions.** All terms, conditions, requirements, limitations, and restrictions set forth in Rule 62-213.300(3), F.A.C., and listed below (Rule 62-213.300(3)(a) through (r), F.A.C.) are "general permit conditions" and are binding upon the owner or operator and upon the responsible official of the facility utilizing this Title V air general permit.
 - (a) The duration of this general permit is five years. No later than 30 days prior to the fifth anniversary of the filing of intent to use this general permit, the responsible official shall submit a new notice of intent which shall contain all current information regarding the facility. The general permit is not transferable and does not follow a change in ownership of the facility. Prior to any sale, other change of ownership, or permanent shutdown of the facility, the responsible official shall notify the Department.
 - (b) The owner or operator of the facility must, upon written notice from the Department, submit payment of an annual operation fee in the amount of \$50.00. This fee is due and payable annually between January 15 and March 1 for the preceding year which the facility was in operation and subject to the requirements of this general permit.
 - (c) This general permit is valid only for the specific activity indicated. Any deviation from the specified activity and the conditions for undertaking that activity shall constitute a violation of the permit.
 - (d) This general permit does not convey any vested rights or any exclusive privileges, nor does it authorize any injury to public or private property nor any invasion of personal rights. It does not authorize any infringement of federal, state, or local laws or regulations.
 - (e) This general permit does not relieve the responsible official or the owner or operator of the facility from liability and penalties when the operation of the permitted activity causes harm or injury to human health or welfare; causes harm or injury to animal, plant or aquatic life; or causes harm or injury to property. It does not allow the responsible official, owner, or operator to cause pollution in contravention of Florida law.
 - (f) This general permit conveys no title to land or water, nor does it constitute state recognition or

- acknowledgment of title.
- (g) The responsible official shall make every reasonable effort to conduct the specific activity authorized by this general permit in a manner that will minimize any adverse effects on adjacent property or on public use of the adjacent property, where applicable, and on the environment, including fish, wildlife, natural resources, water quality, or air quality.
 - (h) The responsible official shall allow a duly authorized representative of the Department access to the permitted facility or activity at reasonable times to inspect and test, upon presentation of credentials or other documents as may be required by law, to determine compliance with this general permit and Department rules.
 - (i) The responsible official shall maintain any permitted facility or activity in good condition.
 - (j) This general permit shall be effective until suspended, revoked, surrendered, expired, or nullified pursuant to Rule 62-213.300, F.A.C.
 - (k) **Monitoring and Related Recordkeeping and Reporting Requirements.**
 1. The responsible official shall maintain records of monitoring information that specify the date, place, time, and operating conditions of measurement; the methodology used; the company or entity which performed the monitoring; and the analytical results. These shall include all calibration and maintenance records, original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by this permit.
 2. The responsible official shall retain records of all monitoring data and supporting information for a period of at least five years from the date of collection.
 3. The responsible official shall keep records in which all occurrences of deviations from any specific monitoring requirements shall be clearly identified. Reports of these deviations shall be submitted to the Department during facility inspections and also submitted with the annual compliance certification as required by paragraph (2)(m)2. The responsible official shall certify each report as true, accurate, and complete.
 4. The responsible official shall ensure that the Department is promptly notified of deviations from any specific monitoring requirements, including those attributable to upset conditions. Notification shall include the probable cause of such deviations and any corrective actions or preventive measures taken. Notification shall be provided within one working day of occurrence of the deviation and may be given by telephone.
 - (l) **Compliance Plan Requirements.**
 1. For each applicable permit condition with which the facility is not in compliance at the time of giving notice to the Department of intent to use this general permit and for which the facility has not come into compliance within 30 days after the giving of such notice, the responsible official shall submit to the Department a compliance plan. The compliance plan shall contain measurable and enforceable milestones, including specific dates for completion of each milestone.
 2. The responsible official shall notify the Department in writing, within 15 days after the date for completion of each milestone, detailing the achievement of compliance, of progress achieved, requirements met or unmet, corrective measures adopted, and an explanation of any measures not met by the completion date for the compliance milestone. The responsible official shall certify that such notice is complete and accurate. Any deviation from the compliance plan shall constitute a violation of the permit condition and shall be subject to the provisions of Rule 62-213.300(2)(d), F.A.C.
 - (m) **Compliance Certification.**
 1. For each applicable requirement with which the facility is in compliance, the responsible official shall submit a statement certifying such compliance to the Department annually. The responsible official shall certify each statement as true, accurate, and complete.
 2. The statement of compliance shall identify each term or condition of the permit with which the facility has remained in compliance during the period covered by the statement and shall specify the method used to demonstrate compliance. It shall identify each term or condition of the permit with which the facility has not been in continuous compliance during that reporting period. It shall also include the monitoring report required pursuant to paragraph (3)(k)3.
 3. For those terms or conditions which the facility has not been in continuous compliance during any reporting period, the statement shall include the exact period of non-compliance, actions taken to achieve compliance, and the method used to demonstrate compliance.
 - (n) This general permit does not authorize any demolition or renovation of the facility or its parts or components which involves asbestos removal. This permit does not constitute a waiver of any of the requirements of Chapter 62-257, F.A.C., and 40 CFR Part 61, Subpart M, National Emission Standard for Asbestos, adopted and incorporated by reference in Rule 62-204.800, F.A.C.
 - (o) **Refrigerant Requirements.** Any facility having appliances or refrigeration equipment, including air conditioning equipment, which use Class I or II ozone-depleting substances such as

chlorofluorocarbons and hydrochlorofluorocarbons listed as refrigerants in 40 CFR Part 82 Subpart A, Appendices A and B, which are adopted and incorporated by reference in Rule 62-204.800, F.A.C., shall service, repair, and maintain such equipment according to the work practices, personnel certification requirements, reporting and recordkeeping requirements, and certified recycling and recovery equipment specified in 40 CFR Part 82, Subpart F, adopted and incorporated in Rule 62-204.800, F.A.C. No person shall knowingly vent or otherwise release any Class I or II substance into the environment during the repair, servicing, maintenance, or disposal of any such device except as provided in 40 CFR Part 82, Subpart F.

- (p) This general permit does not authorize any open burning nor does it constitute any waiver of the requirements of Chapter 62-256, F.A.C.
 - (q) No person shall circumvent any air pollution control device or allow the emission of air pollutants without the proper operation of all applicable air pollution control devices.
 - (r) All reports and notices submitted by the facility and all records required to be maintained according to paragraph (2)(k)3., shall contain a certification statement signed by the responsible official that the documentation is true, accurate, and complete, based upon the information and belief formed after reasonable inquiry.
- (3) Definitions.** The following words and phrases, when used in this notification form, shall have the following meanings:
- (a) "Active Waste Disposal Site" - Any disposal site other than an inactive site.
 - (b) "Adequately Wet" - To sufficiently mix or penetrate with liquid to prevent the release of particulates. If visible emissions are observed coming from the asbestos-containing material, then that material has not been adequately wetted. However, the absence of visible emissions is not sufficient evidence of being adequately wet.
 - (c) "Asbestos" - The asbestiform varieties of serpentinite (chrysotile), riebeckite (crocidolite), cummingtonite-grunerite, anthophyllite, and actinolite-tremolite.
 - (d) "Asbestos-Containing Waste Materials" - Mill tailings or any waste that contains commercial asbestos and is generated by a source subject to the provisions of this permit. This term includes filters from control devices, friable asbestos waste material, and bags or other similar packaging contaminated with commercial asbestos. As applied to demolition and renovation operations, this term also includes regulated asbestos-containing material waste and materials contaminated with asbestos, including disposable equipment and clothing.
 - (e) "Asbestos Mill" - Any facility engaged in converting, or in any intermediate step in converting, asbestos ore into commercial asbestos. Outside storage of asbestos material is not considered a part of the asbestos mill.
 - (f) "Asbestos Tailings" - Any solid waste that contains asbestos and is a product of asbestos mining or milling operations.
 - (g) "Asbestos Waste From Control Devices" - Any waste material that contains asbestos and is collected by a pollution control device.
 - (h) "Category I Nonfriable Asbestos-Containing Material (ACM)" - Asbestos-containing packings, gaskets, resilient floor covering, and asphalt roofing products containing more than 1 percent asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763, section 1, Polarized Light Microscopy.
 - (i) "Category II Nonfriable ACM" - Any material, excluding Category I nonfriable ACM, containing more than 1 percent asbestos as determined using the methods specified in Appendix E, Subpart E, 40 CFR Part 763, section 1, Polarized Light Microscopy; that, when dry, cannot be crumbled, pulverized, or reduced to powder by hand pressure.
 - (j) "Commercial Asbestos" - Any material containing asbestos that is extracted from ore and has value because of its asbestos content.
 - (k) "Construction" - The fabrication (on-site), erection, or installation of an asbestos manufacturing or fabrication unit.
 - (l) "Cutting" - To penetrate with a sharp-edged instrument and includes sawing, but does not include shearing, slicing, or punching.
 - (m) "Demolition" - The wrecking or taking out of any load-supporting structural member of a facility together with any related handling operations or the intentional burning of any facility.
 - (n) "Emergency Renovation Operation" - A renovation operation that was not planned but results from a sudden, unexpected event that, if not immediately attended to, presents a safety or public health hazard, is necessary to protect equipment from damage, or is necessary to avoid imposing an unreasonable financial burden. This term includes operations necessitated by nonroutine failures of equipment.
 - (o) "Emissions Unit" - Any part or activity of a facility that emits or has the potential to emit any air pollutant.
 - (p) "Fabricating" - Any processing (e.g., cutting, sawing, drilling) of a manufactured product that contains commercial asbestos, with the exception of processing at temporary sites (field fabricating) for the construction or restoration of facilities. In the case of friction products,

fabricating includes bonding, debonding, grinding, sawing, drilling, or other similar operations performed as part of fabricating.

- (q) "Facility" - Any institutional, commercial, public, industrial, or residential structure, installation, or building.
- (r) "Facility Component" - Any part of the facility including equipment.
- (s) "Friable Asbestos Material" - Any material containing more than 1 percent asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763, section 1, Polarized Light Microscopy; that, when dry, can be crumbled, pulverized, or reduced to powder by hand pressure. If the asbestos content is less than 10 percent as determined by a method other than point counting by Polarized Light Microscopy (PLM), verify the asbestos content by point counting using PLM.
- (t) "Fugitive Source" - Any source of emissions not controlled by an air pollution control device.
- (u) "Glove Bag" - A sealed compartment with attached inner gloves used for the handling of asbestos-containing materials. Properly installed and used, glove bags provide a small work area enclosure typically used for small-scale asbestos stripping operations. Information on glove bag installation, equipment and supplies, and work practices is contained in the Occupational Safety and Health Administration's (OSHA's) final rule on occupational exposure to asbestos (Appendix G to 29 CFR 1926.58).
- (v) "Grinding" - To reduce to powder or small fragments and includes mechanical chipping or drilling.
- (w) "In Poor Condition" - The binding of the material is losing its integrity as indicated by peeling, cracking, or crumbling of the material.
- (x) "Leak-tight" - A condition in which particulate matter, solids, and liquids cannot escape or spill out from a container.
- (y) "Major Source" - Any affected source which emits or has the potential to emit 10 or more tons per year of any hazardous air pollutant or 25 or more tons per year of any combination of hazardous air pollutants.
- (z) "Malfunction" - Any sudden and unavoidable failure of air pollution control equipment or process equipment or of a process to operate in a normal or usual manner so that emissions of asbestos are increased. Failures of equipment shall not be considered malfunctions if they are caused in any way by poor maintenance, careless operation, or any other preventable upset conditions, equipment breakdown, or process failure.
- (aa) "Manufacturing" - The combination of commercial asbestos-or, in the case of woven friction products, the combination of textiles containing commercial asbestos- with any other materials, including commercial asbestos, and the processing of this combination into a product. Chlorine production is considered a part of manufacturing.
- (bb) "Nonfriable Asbestos-Containing Material" - Any material containing more than 1 percent asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763, section 1, Polarized Light Microscopy; that, when dry, cannot be crumbled, pulverized, or reduced to powder by hand pressure.
- (cc) "Outside Air" - The air outside buildings and structures, including the air under the bridge or in an open air ferry dock.
- (dd) "Particulate Asbestos Material" - Finely divided particles of asbestos or material containing asbestos.
- (ee) "Reconstruction" - The replacement of an asbestos manufacturing or fabrication unit ; or replacement of any components of an asbestos manufacturing or fabrication system to such an extent that the fixed capital cost of the new components exceeds 50 percent of the fixed capital cost that would be required to construct a comparable new system.
- (ff) "Regulated Asbestos-Containing Material" - Includes friable asbestos material, Category I nonfriable ACM that has become friable, Category I nonfriable ACM that will be or has been subjected to sawing, grinding, cutting, or abrading; or Category II nonfriable ACM that has a high probability of becoming or has become crumbled, pulverized, or reduced to powder by the forces expected to act on the material in the course of demolition or renovation operations regulated under 40 CFR Part 61, Subpart M.
- (gg) "Resilient Floor Covering" - Includes asbestos-containing floor tile, such as asphalt and vinyl floor tile, and sheet vinyl floor covering containing more than 1 percent asbestos as determined using polarized light microscopy according to the method specified in Appendix E, Subpart E, 40 CFR 763, section 1, Polarized Light Microscopy.
- (hh) "Responsible Official" - One of the following:
 1. For a corporation: a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to a permit under Chapter 62-213, F.A.C.;

2. For a partnership: a general partner;
 3. For a sole proprietorship: the owner;
 4. For a municipality, state, federal, or other public agency: either a principal executive officer or ranking official.
- (ii) "Source" - Each asbestos manufacturing or fabrication facility.
- (jj) "Visible Emissions" - Any emissions which are visually detectable without the aid of instruments, coming from RACM or asbestos-containing waste material, or from any asbestos milling, manufacturing, or fabricating operation. This does not include condensed, uncombined water vapor.
- (kk) "Year or Yearly" - Any consecutive 12-month period of time.
- (4) **Control Technology Requirements.** Control technology requirements are based upon the type of asbestos product manufactured or fabricated. If the asbestos emissions from the facility equal or exceed 10 tons per year (tpy), the facility must immediately comply with all additional requirements of 40 CFR Part 61, Subpart M, and must apply for a major source permit under Chapter 62-213, F.A.C., within 180 days of that occurrence. New facilities shall comply with all applicable requirements upon start-up. The facility shall operate and maintain equipment according to the manufacturer's specifications. The manuals, design specifications, and other instructional materials shall be kept on-site by the responsible official.
- (a) **Regulated Operations.**
1. Eligible manufacturing operations include:
 - a. Manufacture of cloth, cord, wicks, tubing, tape, twine, rope, thread, yarn, roving, lap, or other textile materials;
 - b. Manufacture of cement products;
 - c. Manufacture of fireproofing and insulating materials;
 - d. Manufacture of friction products;
 - e. Manufacture of paper, millboard, and felt;
 - f. Manufacture of floor tile;
 - g. Manufacture of paints, coatings, caulks, adhesives, and sealants;
 - h. Manufacture of plastics and rubber materials;
 - i. Manufacture of chlorine utilizing asbestos diaphragm technology;
 - j. Manufacture of shotgun shell wads; and
 - k. Manufacture of asphalt concrete.
 2. Eligible fabrication operations include:
 - a. Fabrication of cement building products;
 - b. Fabrication of friction products, except those operations that primarily install asbestos friction materials on motor vehicles; and
 - c. Fabrication of cement or silicate board for ventilation hoods; ovens; electrical panels; laboratory furniture, bulkheads, partitions, and ceilings for marine construction; and flow control devices for the molten metal industry.
- (b) **General Control Requirements.** All facilities shall either:
1. Discharge no visible emissions to the outside air from these operations or from any building or structure in which they are conducted or from any other fugitive source; or
 2. Use the methods specified in 40 CFR 61.152 to clean emissions from these operations containing particulate asbestos material before they can escape to, or are vented to, the outside air.
- (c) **Monitoring Requirements.**
1. Owners or operators shall monitor each potential source of asbestos emissions from any part of the facility, including air cleaning devices, process equipment, and buildings housing material processing and equipment handling, at least once each day during daylight hours for visible emissions to the outside air during periods of operation. Monitoring shall be conducted by visual observation of at least 15 seconds duration per source of emissions.
 2. Owners or operators shall inspect on a weekly basis each air cleaning device for proper operation and for changes that signal the potential for malfunctions, including, to the maximum extent possible without dismantling other than opening the device, the presence of tears, holes, and abrasions in filter bags and for dust deposits on the clean side of bags. For air cleaning devices that cannot be inspected weekly, owners and operators shall submit to the Department and revise as necessary a written operations and maintenance plan as specified in paragraph (2) of this Part.
- (d) **Reporting Requirements.** Owners or operators shall submit to the Department on a quarterly basis a copy of the visible emission monitoring records if visible emissions occurred during the reporting period. Quarterly reports shall be postmarked by the 30th day following the end of the calendar quarter.
- (5) **Recordkeeping Requirements.** The responsible official shall maintain the following visible emissions monitoring records in a log kept on-site, for a minimum of five years:
