Description of Facility

Below, or as an attachment to this form, provide a description of the surface coating operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

Our company applies coatings to wood products. We use a licensed spray booth with a filtered exhaust system. We don't foresee any process changes and we are a low volume user of urethane and solvents. We use HBLP spray guns.

Helpful Definitions

"Coating" - The application of a protective, decorative, or functional film to a surface.

"Department" or **"DEP"** - The State of Florida Department of Environmental Protection.

"Emissions Unit" - Any part or activity of a facility that emits or has the potential to emit any air pollutant.

"Facility" - All of the emissions units which are located on one or more contiguous or adjacent properties, and which are under the control of the same person (or persons under common control).

"Owner" or **"Operator"** - Any person or entity who or which owns, leases, operates, controls or supervises an emissions unit or facility.
