ADDITIONAL SITE INFORMATION:

Machine operating at time of inspection.

I smelled perc vapors and confirmed this with the halogen leak detector. Although the machine was "cooking" at the time, no leaks were detected in the still area.

Minor indication of per vapors came from the separator water holding area. There is a mesh screen on the top of this tank.

The "filter-safe" system pumps the separator water from this area. Mr. Raul Dieguez will fax me info. on corrective actions tomorrow.
