CONTACT(S): Gary Kapps			

Today's visit was to conduct the annual inspection.

The dry cleaning machine is the same one noted in the last inspection.

The machine was in operation today. No leaks or odors were noticed.

The facility is very clean and the machine is well maintained.

Mr. Kapps's record keeping is in good shape. He has recorded the exhaust temperature of the condenser and the leak inspection consistently on a weekly basis. Also his records indicated that a door seal of the machine was replaced in Sep, 1997.

This facility's classification is a "New large area source". However, the perc usage of this machine over the last 12 month was only 80 gallons according to Mr. Kapps's perc purchase receipts and the monthly rolling total.
