Jason,

Good morning!

Yes. You are correct. You verify it, send us the request to change the status of the Facility to INACTIVE and then once completed, I will return an e-mail confirmation to you. Is that your request to change the Facility status to INACTIVE?

Dick

Subject: CHG Engineering Inactivation 0571134

Dick,

Based on two inspections, and our attempts to contact the facility, this facility is shutdown (see attached inspection reports). I believe T'alle is supposed to inactivate GP's in ARMS, correct?

Thanks

Date of Issuance: 1/17/2003

Expiration Date: 1/17/2008

SOURCE DESCRIPTION: Hard Chrome Plating Facility

CONTACT(S): Claude Gates

The purpose of this inspection was to perform follow-up inspection of the facility to verify that it was shut down. Jason Waters, P.E., Joe Panetta of FDEP and I drove by the facility. The entire property was surrounded by a locked fence and appeared to be shut down. Signs were present indicating that the property was for sale. I called the facility's last known phone number on file which connected me to a person not associated with the company. For all intensive purposes, it appeared that the business was permanently shut down. Photographs of the facility can be seen below.

The purpose of this inspection was to perform an annual inspection of the facility. I arrived at the facility around 2:40 p.m. The entire property was surrounded by a locked fence and appeared to be shut down. Signs were present indicating that the property was for sale. I called the facility's phone number on file which connected me to a person not associated with the company. For all intensive purposes, it appeared that the business was permanently shut down. A photograph of the facility can be seen below.
