SURFACE COATING OPERATIONS AIR GENERAL PERMIT REGISTRATION FORM

Facility Identification Number (If known)

NA **0571430-001** RECEIVED

MAY 11 2012

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing permitted facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit). If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner upon the effective date of this air general permit. (see "Surrender of Existing Air Operation Permit(s)" below.)
- Operates an existing facility not currently permitted or using an air general permit.

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Material Usage Rates

If this is an **initial registration** for a surface coating operation, provide an estimate of the average quantity of volatile organic compounds in all coatings (solvents and thinners) expected to be used on a daily basis.

31 lbs/day

If this is a **re-registration** for an existing surface coating operation, provide the highest monthly average of the daily quantity of volatile organic compounds in all coatings (solvents and thinners) used in the last five years. Indicate the month and year during which this usage occurred.

Description of Facility

Below, or as an attachment to this form, provide a description of the surface coating operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

CIBOL INTERNATIONAL LLC dba MAACO Collision Repair and Auto Painting is an auto body shop used for the refinishing and resurfacing of automobiles. This facility contains a DeVilbiss Downdraft Paint Spray booth and Infratech quartz drying enclosure. The paint spray booth is a semi-downdraft booth using paint arrestors with a minimum of 98% efficiency for particulate control. The emissions from the equipment will consist of VOC's and a small amount of particulate after filtration. The applicator is a high efficiency gravity feed gun that provides equal or better transfer efficiency than HVLP. A totally enclosed gun washer will be used for cleanup.

Helpful Definitions

- “Coating” – The application of a protective, decorative, or functional film to a surface.
- “Department” or “DEP” – The State of Florida Department of Environmental Protection.
- “Emissions Unit” – Any part or activity of a facility that emits or has the potential to emit any air pollutant.
- “Facility” – All of the emissions units which are located on one or more contiguous or adjacent properties, and which are under the control of the same person (or persons under common control).
- “Owner” or “Operator” – Any person or entity who or which owns, leases, operates, controls or supervises and emissions unit or facility.

Re: MAACO – Air General Permit Registration

Dear Dick:

Enclosed is the Surface Coating Operations Air General Permit Registration Form for a MAACO Collision Repair and Auto Painting facility located in Tampa, FL. The air general permit processing fee of \$100 is also attached.

If you have any questions you can contact me at 610-286-0305 or the facility owner, Frank Perez, at 813-458-0028.

Best Regards,
