Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
 Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
 Continue operating the facility after a change of ownership.
 Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only

If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.

- All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s): _____
 No air operation permits currently exist for this facility.

Description of Reasonable Precautions

Below, or as an attachment to this form, provide details of all types of reasonable precautions to be used to prevent unconfined emissions at the facility.

Emissions are controlled by water application as needed.

Description of Facility

Below, or as an attachment to this form, provide a description of the concrete batching plant operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

This facility is adding a ready-mix plant to the existing site. The ready-mix plant will be located on the southeast corner of the site and will consist of two portable silos, one of which is a split silo.

The split silo is a 2005 or 2006 Besser Company silo equipped with two Model DCS-260 Besser dust collection systems that have a 99.9% filtration efficiency, one controlling emissions from each compartment of the silo. Each compartment is a 296 barrel (total 593 barrel) that will have cement in both compartments.

The second silo is an in-truss 2008 Besser Company 225 barrel silo that will be controlled by a Model DC-14S Besser dust collection system that has a 99.9% filtration efficiency. This silo will contain fly ash.

The emissions from the truck load-out will be controlled by a C&W Model RA-120 central dust collector that has a 99.9% filtration efficiency.

Copies of the dust collection systems' specifications are included with this application.
