**HUMAN CREMATORIES
AIR GENERAL PERMIT REGISTRATION INFORMATION**

1090453-002-AG – Re-Registration March 2012

Facility Identification Number - If known (seven digit number)

1090453: This is for 5-yr renewal of human crematory Permit No. 1090453-002-AG, which expires 04/08/2012.

1090453-003

Registration Type

Check one:

INITIAL REGISTRATION - Notification of intent to:

- Construct and operate a proposed new facility.
- Operate an existing permitted facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit). If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. (See "Surrender of Existing Air Operation Permit(s)" below.)
- Operates an existing facility not currently permitted or using an air general permit.

RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:

- Continue operating the facility after expiration of the current term of air general permit use.
- Continue operating the facility after a change of ownership.
- Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C.
- Any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.

Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only, if Applicable

All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s):

Emission Unit Details

MANUFACTURER	MODEL NUMBER	SERIAL NUMBER	RATED CAPACITY
<i>EU 001:</i>			
B&L Cremations Systems, Inc.	N20 Series	1863-646-05	150 lb/hr

Design Calculations

If this is an initial registration for a proposed new human crematory unit, provide design calculations to confirm a sufficient volume in the secondary chamber combustion zone to provide for at least a 1.0 second gas residence time at 1800 degrees F.

- Design calculations attached.
- Registration is not for proposed new human crematory unit(s).

Facility Description, Fuel & Controls

This re-registration is for 5-year renewal of the air general permit for one (1) existing B&L Cremations Systems, Inc., N20 Series, 150 lb/hr human crematory incinerator.

The crematory is designed to burn human remains at the average incineration rate of 150 pounds per hour (lb/hr). The incinerator consists of primary and secondary (afterburner) chambers, each fired on natural gas or LPG with a maximum total design heat input rate of 1.5 MMBtu/hr (0.5 MMBtu/hr primary chamber, 1.0 MMBtu/hr secondary chamber).

Emissions are controlled by the afterburner, which will maintain a minimum secondary chamber combustion zone temperature of 1,600°F prior to and during combustion of material in the primary combustion chamber. The secondary chamber is designed to ensure one (1) second residence time at a gas temperature of 1,800°F, and is equipped with a continuous temperature monitor and recorder. The unit is equipped with an opacity monitor that controls the cremation burner if excess emissions are encountered in the stack.
