Dear Mr. McLeod:

This is to acknowledge that your notification of intent to use the authority of Rule 62-210.310 to operate your facility was received on September 20, 2007. We have assigned ARMS # 7775182-002 to this facility.

As you know, pursuant to Florida Statutes section 403.814, authority to operate under general permits commences thirty days after receipt of the registration form unless you have been notified by this office that your facility has not shown entitlement to operate pursuant to the rule provisions.

For your information, authority to operate pursuant to Rule 62-210.310 expires after 5 years. Therefore, a new registration form must be received no later than 5 years after the date your notice was received as indicated above. If your general permit rule conditions require testing, such testing must be completed within the time frame specified in the rule.

If you have any additional questions, please contact Dickson Dibble at 850/921-9586.

Sincerely,

### Description of Facility

Below, or as an attachment to this form, provide a description of the nonmetallic mineral processing operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

Waste rubble concrete and/or asphalt is loaded into horizontal impact crusher with excavator. Material goes through crusher and onto conveyor. Crushed material goes up to screen, where material is either screened out to the finished product conveyor, or recirculated back into the crusher. This recirculated material goes through the crushing screening process until it is the desired size. Once the material is sized correctly, the finished product travels on a conveyor and drops into a pile. Finished product is then picked up by a loader and put into the stockpile.
