

### Florida Department of Environmental Protection

Bob Martinez Center 2600 Blair Stone Road Tallahassee, Florida 32399-2400 Charlie Crist Governor

Jeff Kottkamp Lt. Governor

Michael W. Sole Secretary

September 25, 2008

Mr. Jose Rivera H & R Transport Service 7581 Northwest 59 Way Parkland, Florida 33067

Dear Mr. Rivera:

This is to acknowledge that your notification of intent to use the authority of Rule 62-210.310 to operate your facility was received on August 25, 2008. We have assigned ARMS No: <u>7775533-001</u> to this facility.

As you know, pursuant to Florida Statutes section 403.814, authority to operate under general permits commences thirty (30) days after receipt of the registration form unless you have been notified by this office that your facility has not shown entitlement to operate pursuant to the rule provisions.

For your information, authority to operate pursuant to Rule 62-210.310 expires after five (5) years. Therefore, a new registration form must be received no later than five (5) years after the date your notice was received as indicated above. If your general permit rule conditions require testing, such testing must be completed within the time frame specified in the rule.

If you have any additional questions, please contact Dickson Dibble at 850/921-9586.

Sincerely,

Sandra F. Veazey, Chief Bureau of Air Monitoring and Mobile Sources

SFV/pg

cc: Mr. Clifton Bittle, Broward County

## NONMETALLIC MINERAL PROCESSING PLANTS (CRUSHERS) AIR GENERAL PERMIT REGISTRATION FORM

#### Part II. Notification to Permitting Office

(Detach and submit to appropriate permitting office; keep copy onsite)

Instructions: To give notice to the Department of an eligible facility's intent to use this air general permit, the owner or operator of the facility must detach and complete this part of the Air General Permit Registration Form and submit it to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Please type or print clearly all information, and enclose the appropriate air general permit registration processing fee pursuant to Rule 62-4.050, F.A.C. (\$100 as of the effective date of this form)

Registration Type (13333	-001
Check one:	
INITIAL REGISTRATION - Notification of intent to:  Construct and operate a proposed new facility.  Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).	
RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:  Continue operating the facility after expiration of the current term of air general permit use.  Continue operating the facility after a change of ownership.  Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.	
Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only	<u>*</u>
	1
If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the operation permits being surrendered. If no air operation permits are held by the facility, check the second box.	
All existing air operation permits for this facility are hereby surrendered upon the effective date of this air general permit; specifically permit number(s):	
No air operation permits currently exist for this facility.

Stationary Facility	▼ Relocatable Facility
Type(s) of Precautions Used to Preve	nt Unconfined Emissions
Check all that apply for the managem	nent of roads, parking areas, stock piles and yards:
Maintain Roads/Parking/Yards	
Remove Particulate Matter	Reduce Stock Pile Height Install Wind Breaks
Check the location of spray bars at th	e nonmetallic mineral processing plant:
<b>∠</b> Feeders	☑ Entrance to "Crusher"    ☑ Exit of "Crusher"
Classifier Screens	★ Conveyor Drop Points
Description of Reasonable Precaution	
Below, or as an attachment to this form prevent unconfined emissions at the fact	n, provide details of all types of reasonable precautions to be used to
prevent uncommed emissions at the rac	onty.

DEP Form No. 62-210.920(2)(e) Effective: January 10, 2007

#### **Description of Facility**

Below, or as an attachment to this form, provide a description of the nonmetallic mineral processing operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used

#### RK1012T Rotocrusher

[RK1012T being shovel fed]

#### Machine Overview

The RK1012T Rotocrusher is a large capacity, self contained tracked Impactor. It is fitted with a Swedish designed and manufactured horizontal shaft Impactor and is capable of producing 250tph+ depending on application and settings. The plate feeder, complete with scalping section is fitted with a high capacity hopper to allow rear shovel feed if required.

#### Main Features

- Vibrating plate feeder with scalping section
- Large loading hopper
- 1020 x 780mm (40"x30") feed opening
- Maximum feed size: 300mm (12")
- Crusher unit adjustment fully hydraulic
- Caterpillar Tier III C9 powerpack
- 1000mm (39") wide high discharge product belt
- Rapid set-up
- Dust supression spray bars
- Side dirt belt

#### **Available Options**

- + Hydraulic Clutch
- + Caterpillar Tier III C13 Powerpack with 21 KPTO
- + Autolube
- + Magnet
- + Belt Scales
- + Dust Suppression Spray Bars
- + Other Options Available on Request

# RK1012TIMPACTOR

#### Chassis

The chassis is constructed of heavy-duty profiles and welded steel plates ribbed and stiffened to withstand all operational and travelling stresses. The chassis is mounted on 3.75m (12'-4") centre heavy-duty tracks, with remote control or dog lead operational facility.

#### Feeder

The 4.25m x 0.9m (14'-0" x 36") spring mounted heavy duty vibrating feeder is of twin shaft design. The controls and variable speed are located on the feeder catwalk or alternatively if applicable the feeder can be operated from the tracks remote control, this allows the operator full control of crusher feed rate. The bar frame cassette can be manufactured to the customers specification depending on application and site conditions. The customer has the option of feeding the fines onto the product conveyor belt or onto a 3.6m x 500mm (11'-9" x 20") side dirt conveyor. The feeder is fitted with hydraulic folding heavy-duty cribs to give extra hopper capacity.

#### **Crusher unit**

The RK 1012 crusher unit is fitted with four hammers, 1000mm (39.375") wide. It has a feed opening of 1000 x 600mm (40" x 24") and a rotor diameter of 1200mm (47"). There are two adjustable aprons and a final bar carrier which can be adjusted from 4 to 80mm (3/16" to 3") depending on material feed size and reduction required, the second apron and bar carrier can be adjusted hydraulically. It is driven through 8 V-Belts and the chamber can be easily accessed by hydraulic control lever. There is a deadbox fitted under the crusher to allow easy flow of material onto the product conveyor. A speed sensor is fitted to the rotor that cuts of the feed before the crusher overloads.

#### **Product Conveyor**

The product conveyor is fitted with a 1000mm (40") heavy duty 4 ply belt and runs on heavy duty troughing rollers, impact bars are fitted under crusher to give belt full support at crusher exit. The conveyor is driven hydraulically through a flexible coupling and high torque reduction gear at the rubber lagged top end drum.

#### Power Unit

The diesel engine is a Caterpillar Tier III C9 power pack and the crusher is driven through a heavy duty Twin Disc IBF 314 (3 plate) PTO. The pulley on the clutch can be easily changed to alter the rotor speed. The conveyors, feeder, and rams are all driven hydraulically through pumps fitted to the engines auxiliary drive.

#### **Catwalks and Guards**

All relevant catwalks, handrails and guards are fitted to this machine allowing access to all relevant maintenance points. Emergency stops are fitted to all necessary points. The machine carries the European CE mark and therefore complies with all Essential Safety Requirements.

#### **Hydraulic Tank Capacity**

500 litres (110 gallons - 132 US gallons)

#### Diesel Tank Capacity

700 litres (155 gallons - 185 US gallons)

#### Options 🖑

- Hydraulic clutch
- Caterpillar Tier-III C13 Powerpack with 21 KPTO
- Autolube
- Magnet
- Belt Scales
- Dust Suppression Spray Bars
- other options available on request
