NONMETALLIC MINERAL PROCESSING PLANTS (CRUSHERS) AIR GENERAL PERMIT REGISTRATION FORM

Part II. Notification to Permitting Office

(Detach and submit to appropriate permitting office; keep copy onsite)

Instructions: To give notice to the Department of an eligible facility's intent to use this air general permit, the owner or operator of the facility must detach and complete this part of the Air General Permit Registration Form and submit it to the appropriate Department of Environmental Protection or local air pollution control program office which has permitting authority. Please type or print clearly all information, and enclose the appropriate air general permit registration processing fee pursuant to Rule 62-4.050, F.A.C. (\$100 as of the effective date of this form)

1/1/07.77=
Registration Type
Check one:
INITIAL REGISTRATION - Notification of intent to:
Construct and operate a proposed new facility.
Operate an existing facility not currently using an air general permit (e.g., a facility proposing to go from an air operation permit to an air general permit).
RE-REGISTRATION (for facilities currently using an air general permit) - Notification of intent to:
Continue operating the facility after expiration of the current term of air general permit use.
Continue operating the facility after a change of ownership.
Make an equipment change requiring re-registration pursuant to Rule 62-210.310(2)(e), F.A.C., or any
other change not considered an administrative correction under Rule 62-210.310(2)(d), F.A.C.
Surrender of Existing Air Operation Permit(s) - For Initial Registrations Only
If the facility currently holds one or more air operation permits, such permit(s) must be surrendered by the owner
or operator upon the effective date of this air general permit. In such case, check the first box, and indicate the
operation permits being surrendered. If no air operation permits are held by the facility, check the second box.
All existing air operation permits for this facility are hereby surrendered upon the effective date of this air
general permit; specifically permit number(s):
No air operation permits currently exist for this facility.
2.10 and operation permits variously exist for any memory.
General Facility Information
Facility Owner/Company Name (Name of corporation, agency, or individual owner who or which owns, leases,
operates, controls, or supervises the facility.)
AAction Recycling Corporation
Site Name (Name, if any, of the facility site; e.g., Plant A, Metropolis Plant, etc. If more than one facility is
owned, a registration form must be completed for each.)
AAction Recycling Corporation
Facility Location (Provide the physical location of the facility, not necessarily the mailing address.)
Street Address: 1465 County Road 210 W
City Cacksmylle County: St. Cohns. Zip Code: 32259
Facility Start-Up Date (Estimated start-up date of proposed new facility.)(N/A for existing facility)
N/a

Description of Facility

Below, or as an attachment to this form, provide a description of the nonmetallic mineral processing operations at the facility in sufficient detail to demonstrate the facility's eligibility for use of this air general permit and to provide a basis for tracking any future equipment or process changes at the facility. Describe all air pollutant-emitting processes and equipment at the facility, and identify any air pollution control measures or equipment used.

The facility does not exist at an actual location. All of the equipment is mobile and normally travels to the site where the raw material is generated. Normal operations include recycled asphalt pavement (RAP) crushing at asphalt plants and waster concrete "ribbons" crushing at batch concrete plants. The size, types and numbers of equipment used depend on the actual project. Different equipment may be used at different sites depending on the project requirements.

Generally, operations are as follows:

If required, a mauler breaks up oversize materials in order that they can fit into the hopper of the crusher. Materials processed by the mauler then are fed into one or more, if needed, crushers. Crushed material is then passed over various sized screens to obtain the proper size final materials.

Operating hours are dependent of the particular job. They can operate 10 hours a day for several days to a few weeks at a site depending on the raw material available.
