

Appendix U-1, List of Unregulated or Exempt Emission Units

SAFT America Inc.

DRAFT Permit Number: 0310572-003-AC
Facility ID Number: 0310572

Unregulated Emission Unit: An emission unit (EU) which emits no "emissions-limited pollutant" and which is subject to no unit-specific work practice standard, though it may be subject to regulations applied on a facility-wide basis (e.g., unconfined emissions, odor, general opacity) or to regulations that require only that it be able to prove exemption from unit-specific emissions or work practice standards.

Exempt Emission Unit: An emission unit not required to be permitted in accordance with 62-210.300(3)(a) or (b), Florida Administrative Code (F.A.C.). Exemption from the requirement to obtain an air permit does not relieve the owner or operator of a facility or emissions unit from complying with any limitation or requirement applicable to such facility or emissions unit.

The below listed emission units and/or activities are either "unregulated" emission units or "exempt" emission units.

<u>EU Description</u>	<u>Explanation</u>
Emergency Generator	These units are exempt from permitting as long as they meet the requirements of Rule 62-210.300(3)(a)35, F.A.C. These units are subject to both 40CFR63 Subpart ZZZZ in accordance with 40CFR63.6590(b)(3)(vii) and 40CFR60 Subpart IIII in accordance with 40CFR60.4200(a)(2)(i).
Corona Treatment of aluminum substrate	Ozone is a regulated pollutant but there is no emission limiting standard for this process.
