Authorized Representative:

Penny Manuel, Vice President and SPO

On January 23, 2007, Gulf Power submitted an application to revise Conditions of Permit No. 0330045-005-AC. The original permit authorized construction of a new electrostatic precipitator and the installation of a new selective catalytic reduction (SCR) system for Boiler No. 7 (EU-007) at the Crist Electric Generating Station, which is located on Pate Road, off of 10 Mile Road on Governors Bayou, Escambia County, Florida. With regard to this permit, the applicant requested a revision to clarify the testing requirement for the SCR control efficiency and, additional flexibility to bypass the SCR system to perform maintenance or repair. The Department approves these requests as specified in the attached revisions.

Enclosed is the Final Permit Revision, which modifies the original air construction permit. A copy of this letter shall be filed with the referenced permit and shall become part of the permit. This permit modification is issued pursuant to Chapter 403, Florida Statutes.

Any party to this order has the right to seek judicial review of it under Section 120.68 of the Florida Statutes by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the clerk of the Department of Environmental Protection in the Office of General Counsel (Mail Station #35, 3900 Commonwealth Boulevard, Tallahassee, Florida, 32399-3000) and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The notice must be filed within thirty (30) days after this order is filed with the clerk of the Department.
