ENVIRONMENTAL PROTECTION COMMISSION OF
HILLSBOROUGH COUNTY, as Delegated by

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION

NOTICE OF PERMIT

Timothy J. Aydt
Deputy Assistant Secretary
Marathon Petroleum Company, LLC
539 South Main Street
Findlay, Ohio 45840

Re: Hillsborough County - AP

Dear Mr. Aydt:

Enclosed is Permit Number 0570080-034-AC for the Tampa Light Products Terminal authorizing the replacement of the roof of Tank No. 55-10. After the replacement of the roof, Tank No. 55-10 will have a bolted internal floating roof with a mechanical-shoe primary seal and a shoe-mounted secondary seal, issued pursuant to Section 403.087, Florida Statutes.

Any party to this order (permit) has the right to seek judicial review of the permit pursuant to Section 120.68, Florida Statutes, by the filing of a Notice of Appeal pursuant to Rule 9.110, Florida Rules of Appellate Procedure, with the Clerk of the EPC in the Legal Department at 3629 Queen Palm Drive, Tampa, FL 33619; and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The Notice of Appeal must be filed within 30 days from the date this Notice is filed with the clerk of the EPC.

Executed in Tampa, Florida

Tampa, FL 33605

PERMIT/CERTIFICATION

Permit No.: 0570080-034-AC
County: Hillsborough
Expiration Date: August 21, 2015
Project: Tank No. 55-10 Roof Replacement

This permit is issued under the provisions of Chapter 403, Florida Statutes, and Florida Administrative Code Rules 62-204, 62-210, 62-212, 62-296, 62-297, and 62-4. The above named permittee is hereby authorized to perform the work or operate the facility shown on the application and approved drawing(s), plans, and other documents, attached hereto or on file with the EPC and made a part hereof and specifically described as follows:

This project authorizes the replacement of the roof of Tank No. 55-10, which currently has a doomed, external floating roof tank with a mechanical-shoe primary seal. After the replacement of the roof, Tank No. 55-10 will have a bolted internal floating roof with a mechanical-shoe primary seal and a shoe-mounted secondary seal.

This facility is a bulk terminal that handles and stores petroleum products and petroleum product additives. Gasoline, ethanol, distillates, additives, and asphalt products are received via barge or tanker and stored in above ground storage tanks. All of the products are subsequently loaded into trucks for shipment offsite or can also be delivered into the pipeline owned by Central Florida Pipeline. The operations at this facility include 29 permitted storage tanks; an asphalt heater; a barge loading operation; and two truck loading racks. Each loading rack consists of five loading bays and each loading bay has 5 to 6 loading arms depending on the available arms in service.

The truck loading racks are controlled by two Vapor Recovery Units (VRUs), Jordan Technologies Units, Model Nos. JOR JT4-11089-2X7240, and a R. A. Nichols Vapor Combustor Unit (RANE VCU), Model No. 8E27DB, Serial No. E24/B14. Each VRU contains two activated carbon beds and regeneration equipment. The RANE VCU is the backup control device for the VRUs in case of equipment malfunction or maintenance activities.

The permitted storage tanks include the gasoline floating roof group tanks, diesel fixed roof group tanks, additive group tanks, and a transmix tank. The following table lists the gasoline floating roof group storage tanks at Marathon Petroleum Company.
