

## Research and Development Activities - Facility Wide

Old Location	Equipment/Activity	New Location	Capture System	Notes
Building 6B - Bay 1	Accurate Feeder, Palla Mill, Simpson Mixer, Stokes Granulator	Building 10, Bay 4	None, no exhaust to the outside environment	
Building 6B - Bay 2	Stokes Granulator	Building 10, Bay 4	None, no exhaust to the outside environment	The Accurate feeder and Teledyne mixer once in this Bay were incorporated into the granulation portion of EU006
Building 6B - Bay 3	Screener/Feeder, Hammermill	Building 10, Bay 4	None, no exhaust to the outside environment	
Building 6B - Bay 4	Ovens	Two in Building 10, Bay 1	Ovens in Building 10 are listed in the 'Exempt Activities' Table	One oven is in storage, one was shipped overseas.
Building 6B - Bay 5	Press	Left in place in 6B		Long term storage
Building 6B - Bay 6	General Work Area			No activity
Building 6B - Bay 7	Press	Left in place in 6B		Long term storage
Building 6B - Bay 8	Igniter Deployment	Left in place in 6B		No activity
Test Area	Igniter Test Chamber	Left in place in 6B		No plans to use this equipment
Test Area	ESD Meter	Building 2	None, the machine will be used in Building 2 without any active exhaust system	
Test Area	Impact Tester	Building 2	None, the machine will be used in Building 2 without any active exhaust system	
Test Area	Strand Burner and Weighout	Left in place in 6B		No plans to use this equipment
Injection Molding	Molds plastic igniter casings	Left in place in 6B	Exhaust hood over molders	The molders could be used in Building 6B - process rate would be less than 100 lb/year
