Dear Mr. Sheplak:

We are in receipt of the attached letter dated April 5, 2002. The purpose of this letter is to inform you that we believe both the **Gainesville Division (DEP Facility ID: 0010041)** and the Lake City Division (DEP Facility ID: 0230019) of the North Florida/South Georgia Veterans Health System are **NOT Major Sources of hazardous air pollutants (HAPs)** and therefore we are not subject to this requirement.

Please contact Frank Campbell, Chief, Facilities Management Service at 904-755-3016, extension 2138, if you have any questions

Sincerely,

THOMAS SUTTON
Acting Director

To the Title V Air Permitting Contact Person:

Our records indicate that your facility may be a major source of hazardous air pollutants and may be in the affected **Industrial, Commercial & Institutional Boilers and Indirect-fired Process Heaters** source category. Therefore, **you must notify us by May 15, 2002 if you think** your facility is a major source of hazardous air pollutants and is in an affected industry type source category. A list of affected industry type source categories is printed on the reverse side of this letter.

The Clean Air Act (CAA), as amended in 1990, requires that the USEPA publish federal regulations by May 15, 2002 to determine the maximum achievable control technology (MACT) to reduce emissions of hazardous air pollutants (HAPs) from certain industry type source categories at facilities that emit major amounts of hazardous air pollutants. A major amount of hazardous air pollutants is considered to be 10 tons per year or more of a single hazardous air pollutant, or 25 tons per year or more of a combination of hazardous air pollutants. However, the USEPA is not likely to publish the federal MACT regulations until May 15, 2004 instead of May 15, 2002, the MACT "hammer" date. As a result, Section 112(j) of the Clean Air Act must be initiated.

If you think your facility is a major source of hazardous air pollutants and is in an affected industry type source category, you must submit to our office and the USEPA by **May 15, 2002** the following **112(j) notification information**, which may be in letter format:

- (1) The name, address (physical location), and brief description of the major source (facility);
- (2) An identification of the relevant industry type source category(ies) [See list on reverse side of this letter.];
- (3) A list of the emission units belonging to the relevant industry type source category(ies); and
- (4) An identification of any affected sources for which a section 112(g) MACT determination has been made.

This submittal must be signed by the Title V permit Responsible Official. The mailing addresses for the 112(j) contacts at our office and the USEPA are:

Ms. Cindy Phillips, P.E.
FDEP Bureau of Air Regulation
MS 5505
2600 Blair Stone Road
Tallahassee, FL 32399-2400

Mr. Doug Neeley
Air, Pesticides, and Toxics Management Division
USEPA Region IV
61 Forsyth Street, SW
Atlanta, GA 30303-8960

This notification requirement does not affect the processing of any Title V permits that are undergoing renewal now or in the near future. Any newly applicable NESHAP requirements that may be promulgated by May 2004 will be incorporated into your Title V permit through the procedures specified in 40 CFR 70.7 (f), *Reopening for cause*. As before, any new construction or reconstruction that, by itself, will emit a major amount of hazardous air pollutants, will likely require a 112(g) Case-by-case MACT determination during the construction permitting process.

If you have any questions, please contact Ms. Cindy Phillips at 850-921-9534 or Cindy.Phillips@dep.state.fl.us.

Sincerely,

Scott M. Sheplak, P.E. Administrator

Title V Section, Bureau of Air Regulation "More Protection, Less Process"
