RE: Draft permit to allow use of natural gas for fueling kiln and RM air heater  
Facility 0010087, Permit No. 0010087-015-AC (Draft)  
Florida Rock Industries, Inc.—Thompson S. Baker Cement Plant

Dear Cindy:

Thank you for the draft copy of the permit. We published the public notice on September 10, 2005, in The Gainesville Sun. The affidavit was sent to you last week.

One request I have is to amend page 2 so that the final version of the permit shows that EU 002 (the Raw Mill System) is also affected by this modification. At present, our Title V permit allows only no. 2 fuel oil to be burned in the raw-mill air heater. Most of the natural gas will use will be burned in the raw-mill air heater; and the remainder in the main burner. The public notice does refer to this use, so I don't believe any re-publication would be necessary.

If you have any questions, please call me at 352-472-4722, ext. 121.

Sincerely,  
FLORIDA ROCK INDUSTRIES, INC.

  
Henry Gotsch  
Environmental Manager
