Jacksonville, FL 32256-7590

RE: Modification of construction permits nos. 0010087-017-AC and 0010087-021-AC and
surrender of construction permit no. 0010087-20-AC.
Facility ID 0010087; Florida Rock Industries, Inc.—Thompson S. Baker Cement Plant

Dear Mr. Kirts:

We request that two construction permits be modified to extend their expiration dates and a third be surrendered as follows:

Permit No. 0010087-017-AC

Construction has begun on the "above-water rock crusher", and we expect to schedule performance testing for April. To allow time for performance-test-report preparation and for application to incorporate the crusher into the Title V permit, we request that the expiration date of this permit be extended until December 31, 2008.

Permit No. 0010087-021-AC *

Construction has begun on the selective non-catalytic reduction (SNCR) system, and we expect to complete testing of the system by the end of September. To allow time for demonstration and troubleshooting of the system and for application to incorporate the SNCR system into the Title V permit, we request that the expiration date of this permit be extended until December 31, 2008.

Permit No. 0010087-020-AC

After considerable evaluation of various means of delivering granulated blast-furnace slag to the clinker cooler, we have cancelled plans for this project. We wish to surrender this construction permit.

Please contact me at (352) 472-4722, ext. 121, if you have any questions.

Sincerely,
FLORIDA ROCK INDUSTRIES, INC.

Chris Horner
Plant Manager
