RE: Request for minor change to draft permit for SNCR use
Air-construction permit no. 0010087-021-AC
Florida Rock Industries, Inc.—Thompson S. Baker Cement Plant

Dear Mr. Linero:

Thank you for the draft permit to allow installation and use of SNCR. We have reviewed the conditions and have one request for change. Specific condition 5 of this permit states that the concentration by weight of stored ammonia solutions shall be between 9 and 19%. Among the vendors we are considering is one who offers a solution of 19.5%, which would be outside of the range requested by our application. To accommodate this and future vendor's offers, we request that a minor change in the language of the draft permit be made that allows either solutions of "9 to 19.8%" or solutions of "not more than 19.8%".

If you have any questions or would like additional information, please call me at 352-472-4722, ext. 121.

Sincerely,
FLORIDA ROCK INDUSTRIES, INC.

O. Henry Gotsch, P.E.
Environmental Manager
