RE: Indian River Power Plant, Request to incorporate Minor Air Construction Permit #0090196-010-AC into the Title V permit #0090196-011-AV

*File # 0090196-013-AV*

Dear Ms. Trina Vielhauer:

RRI Energy Florida, LLC formally requests the amendment of the Title V permit for the Indian River Power Station to incorporate the conditions in the Minor Air Construction Permit #0090196-010-AC.

The Title V permit is currently in the process of being renewed. It was published October 16, 2009 and we submitted comments on November 10, 2009. Since the changes associated with the construction permit are minor, we'd appreciate the Department including the new language in the Title V permit renewal. Essentially, the only change is the addition of the following language "Based on a 4-hour rolling average, the maximum heat input rates are:" to Section III, Subsection A, Condition A.1.

We understand that we can start using the 4-hour rolling average basis for the heat input limits upon submittal of this request. We appreciate your consideration of our request. If you have concerns or questions, please contact Michelle Duncan at 724-597-8631.

Sincerely,

Dennis D. Shaulis  
General Manager, Indian River Power Plant
