Tallahassee, FL 32399-2400

Subject: Indian River Power Plant Permit Transfer
Facility ID No. 0090196
Permit Number 0090196-AV

Dear Mr. Holtom:

Permit (Project No. :) 0090196-016-AV

On January 13, 2012 GenOn Florida, LP sold the Indian River Power Plant to the Orlando Utilities Commission (OUC). Written notification of this sale and pending submittal of the required permit transfer forms was provided in a letter to FDEP from GenOn dated January 13, 2012. At this time, OUC is requesting that all conditions contained in Permit Number 0090196-AV be incorporated into the existing OUC Permit Number 0090008-AV. No modifications of any conditions within Permit 0090196-AV are requested. The incorporation of this permit will allow for OUC, as the sole owner of all regulated and unregulated emission units at the facility, to operate the facility under a single Title V permit.

Enclosed please find the completed DEP Form 62-1.201(1) and Form 62-210.900(7) in support of the request to transfer the above referenced air permit from GenOn Florida, LP to OUC. Also included, per your request, is a completed engine applicability questionnaire for the facility's emergency generator.

If you have any questions, please contact Mike Kyhos of my staff at 407-434-3036.

Sincerely,

Chip Merriam
Chief Legislative and Regulatory Compliance Officer

Engine Applicability Questions

1. Does your facility have the potential to emit 10 or more tons/year of any single hazardous air pollutant or 25 or more tons/year of any combination of hazardous air pollutants?(Area or Major Source)

Yes

2. What type of fuel does the engine use?

Diesel fuel

3. What is the HP (Hint: 1 HP = 0.7456 KW) of the stationary engine?

~235 HP

4. Is the engine a temporary replacement unit and located at a stationary source for less than 1 year and has been properly certified as meeting the standards that would be applicable to such engine under the appropriate non-road engine provisions?

No

5. Is the engine a new, existing, or reconstructed engine?

Existing

6. Do you have a Manufacturers Certification for the engine?

No

7. Does the engine meet any of the following conditions;
(1) The fixed capital cost of the new components exceeds 50 percent of the fixed capital cost that would be required to construct a comparable new source; and
(2) It is technologically and economically feasible for the reconstructed source to meet the relevant standard(s) established by the Administrator (or a State) pursuant to section 112 of the Act.

No

8. When did you commence construction (date the engine is ordered by the owner or operator) or reconstruction on your stationary engine (ex. June 12, 2006 = 06/12/06)?

1964

9. What is the date of manufacture of the engine?

1964

10. What is the engine displacement (l/cyl)(Hint:1 cc = 0.001 l & V# = # cylinders)

Engine has a displacement of approximately 14.6 liters (based on a bore of 5.4 inches and a stroke of 6.5 inches for the 6-cylinder engine).

Engine Applicability Questions

11. Does the engine use an oxidation catalyst?

No

12. Does the engine have a CEMS (continuous emissions monitoring system)?

No

13. Does the engine have NSCR (non-selective catalytic reduction)?

No

14. Does the engine use a CPMS (continuous parameter monitoring system)?

No

15. What are the total hours of operation per year for engine?

<100 Hours per year for the purpose of maintenance checks and readiness testing

16. How many of the total hours during an emergency situation?

Engine described in this form is a Caterpillar D343A diesel-fired emergency generator. The only hours of operation for this generator will be during an emergency situation, with the exception of operating time for the purpose of maintenance checks and readiness testing as described in Number 15.

17. How many of the total hours are part of the demand response program?

0 hours

18. Is the engine used for peak shaving, to generate income for a facility to supply power to an electrical grid, or supply power as a part of a financial arrangement with another entity?

No

19. What type of engine do you have? (ex. CI, SI, 4SLB, 2SLB)

Compression ignition (CI)
