Re: Crystal River Power Plant – Permit Number 0170004-018-AC / PSD-FL-392 –  
Comments on the Draft Air Permit Crystal River Power Plant South Cooling  
Towers Project

Dear Ms. Branum:

Thank you very much for providing the draft construction permit for the South Cooling Towers Project at our Crystal River Site. Progress Energy's comments on the draft construction permit are as follows:

The permit references existing cooling towers with the emission unit number EU-013. The correct emission unit number should be EU-020. Emission unit EU-013 is a set of concrete mechanical draft cooling towers that are more permanent in nature. Emission unit EU-020 is referred to in the Title V permit as "portable cooling towers" we refer to them as "modular cooling towers". Emission unit EU-020 (the modular cooling towers) may be replaced with the above referenced air construction permit, the "South Cooling Towers". The decision on whether we will retain EU-020 (the modular cooling towers)

If you have any questions, please contact me at (727) 820-5295. Thank you very much for processing the Construction permit.
