---

**Barbara** – Please clerk and issue the final permit for the referenced facility.

**Jeff** – Welcome back. This final permit authorizes Duke Energy to conduct a test burn of new coal blends. They will be blending Powder River Basin with Western Bituminous coal. Additional temporary controls will be used such as hydrated lime injection and activated carbon injection system upstream of the ESP. The test burn is authorized for a total of 90 days (not consecutive) which shall be completed by December 31, 2013. A minor comment from the applicant was submitted.

Thanks,  
Syed
