Applicant: the applicant for this project is FPL, the applicant's responsible official and mailing address are: Rudy Sanchez, Turkey Point General Manager, FPL, Turkey Point, 9700 SW 344th Street, Homestead, Florida 33035.

Facility Location: the applicant operates the existing Turkey Point Power Plant, which is located in Miami Dade County, at 9700 SW 344th Street, Homestead, Florida.

Project: the applicant applied on September 9, 2011 to the department for an air construction permit revision. This is a revision of permit No. 0250003-008-AC; The existing fossil fuel power plant consists of two 440 MW boilers (Units 1 and 2), one natural gas-fueled 1,150 MW combined cycle unit (Unit 5) and supporting equipment.

This revision makes minor changes to the Best Available Control Technology (BACT) construction permit for fossil fired boilers, either Units 1 or 2, which are placed on Inactive Reserve and this revision also extends the permit expiration date. Currently, Unit 2 is shut down and is expected to be on inactive reserve for an extended period; therefore the installation of emission controls is delayed until the unit is restarted on fuel oil. An alternative control option is for FPL to submit an application to the department by the dates shown in the revised permit conditions to only fire natural gas in these boilers or repowering with natural gas units.

Permitting Authority: Applications for air construction permits are subject to review in accordance with the provisions of Chapter 403, Florida Statutes (F.S.) and chapters 62-4, 62-212 of the Florida Administrative Code (F.A.C.). The proposed project is not exempt from air permitting requirements and an air permit is required to perform the proposed work. The permitting Authority responsible for making a permit determination for this project is the Department of Environmental Protection Office of Permitting and Compliance in Tallahassee.
