FINAL PERMIT DETERMINATION

I. Comment(s).

The PROPOSED Title V Permit Renewal was posted on the Department's web site on May 4, 2004, for review by U.S. EPA's Region 4 Office in Atlanta. As of close of business on May 13, 2004, *no comments had been received from EPA*. Because the facility's initial Title V permit expiration date was May 18, 2004, the Atlanta Office was contacted on May 14, 2004, as to status of their review of the PROPOSED Permit. On May 17, 2004, an EPA spokesperson indicated that the Agency had chosen *not to review this permit*, and thus the FINAL Title V Permit could be issued in a timely fashion to avoid any lapse in permit coverage for the facility.

II. Conclusion.

The permitting authority hereby issues the FINAL Permit Renewal No. 0250013-002-AV with no changes.

Title V Air Operation Permit Renewal
Permit No. **0250013-002-AV**

This Title V air operation permit renewal is issued under the provisions of Chapter 403, Florida Statutes (F.S.), and Florida Administrative Code (F.A.C.) Chapters 62-4, 62-210 and 62-213. The above named permittee is hereby authorized to perform the work or operate the facility shown on the application and approved drawing(s), plans, and other documents, attached hereto or on file with the permitting authority, in accordance with the terms and conditions of this permit.

This facility consist of sixteen (16) unregulated dual fuel fired engine generators, two (2) unregulated cooling towers, and various unregulated fuel oil and miscellaneous storage tanks. The generators are peaking units and are used only on a grid demand basis. The highest usage time is generally in the summer time. The facility does keep one generator operating (usually #18, #19, #20 or #21) at idle all the time just for immediate response needs. Generators #2, #3, #13, #14, #15, #16 and #17 are rated at 2070 kW; generators #8, #9 and #10 are rated at 2500 kW; generators #11 and #12 are rated at 3270 kW; generators #20 and #21 are rated at 6485 kW; and, generators #18 and #19 are rated at 8800 kW.

Each generator is started on 100% No. 2 fuel oil and continues until it achieves the proper operating temperature, which takes approximately 5 to 10 minutes. Then, the generators are switched over to a dual fuel firing mode, which is a 95% natural gas and 5% distillate No. 2 fuel oil mixture. The sulfur content of the distillate No. 2 fuel oil being fired is 0.05%, by weight, or less.

Based on the Title V permit renewal application received on March 8, 2004, this facility is not a major source of hazardous air pollutants (HAPs).

Unregulated Emissions Units and/or Activities. An emissions unit which emits no “emissions-limited pollutant” and which is subject to no unit-specific work practice standard, though it may be subject to regulations applied on a facility-wide basis (e.g., unconfined emissions, odor, general opacity) or to regulations that require only that it be able to prove exemption from unit-specific emissions or work practice standards.

For those unregulated emissions units subject to the *General Visible Emissions Standard* at Rule 62-296.320(4)(b), F.A.C., then the provisions of Rule 62-210.700, F.A.C., *Excess Emissions*, are available for purposes of compliance.

The below listed emissions units and/or activities are neither ‘regulated emissions units’ nor ‘insignificant emissions units’.

Appendix I-1, List of Insignificant Emissions Units and/or Activities.

The facilities, emissions units, or pollutant-emitting activities listed in Rule 62-210.300(3)(a), F.A.C., Categorical Exemptions, or that meet the criteria specified in Rule 62-210.300(3)(b)1., F.A.C., Generic Emissions Unit Exemption, are exempt from the permitting requirements of Chapters 62-210, 62-212 and 62-4, F.A.C.; provided, however, that exempt emissions units shall be subject to any applicable emission limiting standards and the emissions from exempt emissions units or activities shall be considered in determining the potential emissions of the facility containing such emissions units. Emissions units and pollutant-emitting activities exempt from permitting under Rules 62-210.300(3)(a) and (b)1., F.A.C., shall not be exempt from the permitting requirements of Chapter 62-213, F.A.C., if they are contained within a Title V source; however, such emissions units and activities shall be considered insignificant for Title V purposes provided they also meet the criteria of Rule 62-213.430(6)(b), F.A.C. No emissions unit shall be entitled to an exemption from permitting under Rules 62-210.300(3)(a) and (b)1., F.A.C., if its emissions, in combination with the emissions of other units and activities at the facility, would cause the facility to emit or have the potential to emit any pollutant in such amount as to make the facility a Title V source.

The below listed emissions units and/or activities are considered insignificant pursuant to Rule 62-213.430(6), F.A.C.
