Subject: Request For Extension of Time
To Submit RACT Analysis
Rinker Materials Corporation
Cement Kilns 1 and 2
FDER Permit No. A013-172954

Dear Mr. Fancy:

This is a follow up to a telephone conversation with Mr. John Reynolds regarding an extension of time to submit a RACT analysis for the above referenced cement kilns at the Rinker facility in Miami, Dade County, Florida.

A RACT analysis for nitrogen oxides emissions from the kilns, required in accordance with FAC Rule 17-296.570, is expected to be submitted to FDER within 90 days. The extension will allow adequate time for the review and assessment of available control technology. The kilns current permit No. A013-172954 was issued on March 1, 1990, and expires on January 15, 1995.

If you have any questions, please do not hesitate to give me a call.

Very truly yours,

KOOGLER & ASSOCIATES

Pradeep A. Raval
