**PUBLIC NOTICE OF INTENT TO ISSUE AIR CONSTRUCTION PERMIT**

STATE OF FLORIDA  
DEPARTMENT OF ENVIRONMENTAL PROTECTION  
DEP File No. 0250407-005-AC  
Nalite International, Inc.  
Miami-Dade County

The Department of Environmental Protection (Department) gives notice of its intent to issue an air construction permit issued to Nalite International, Inc. (revising certain conditions in the original construction permit issued to Nalite in September 2000). That permit (DEP File No. 0250407-003-AC, PSD-FL-269) provided for installation of a new panel spray coating line at 1111 NW 165th Street and relocation of an existing spray coating line from its former location at 1251 NW 165th Street to a new location at 1111 NW 165th Street, Miami, Dade County. The applicant's mailing address is: Nalite International, Inc., 1111 NW 165th Street, Miami, Florida 33166.

The original construction permit considered the new line as a modification of an existing major facility since the two locations were considered adjacent and thus the same facility under the Department's Prevention of Significant Deterioration rules (Rule 62-212.400, F.A.C.) A Best Available Control Technology (BACT) determination was required in the original permit for emissions of volatile organic compounds (VOC) from the new line pursuant to Rule 62-212.400, F.A.C. and 40 CFR 62.21, Prevention of Significant Deterioration (PSD), A Maximum Achievable Control Technology (MACT) determination was required for hazardous air pollutants (HAPs) pursuant to Rule 62-304.800, F.A.C. and 40 CFR 63, National Emission Standards for Hazardous Air Pollutants (NESHAPs), Subpart B, Requirements for Control Technology Determinations for Major Sources in Accordance with Clean Air Act Sections 112(g) and 112(j).

The revision stems from the company's ongoing efforts to convert its processing technology from spray coating to non-spray pigment injection. Nalite currently manufactures and coats plastic shingles molded from polypropylene pellets. This process conversion is expected to significantly reduce long term emissions of VOCs currently permitted to be emitted. In connection with the conversion, the applicant has applied to the Department for revision of certain requirements in its existing air permits. The most important permitting change is an extension of the shutdown date for the old coating line (Emission Unit 001) from December 31, 2002 to December 31, 2003, after which the old line will be permanently shut down. The additional year of operation of the old line will be carried out in such a manner that the total controlled emissions from the facility, including EU-001 and the new line (EU-004), will be substantially less than the major source threshold of 250 tons per year, making Nalite a "synthetic" minor facility under Department PSD rules. Also required by the permitting revision is additional emissions testing to establish emission limits that will apply permanently for the new line and for the CV 2003 operation of the old line. MACT applicability for the new line is unchanged from the original permit because the emissions of hazardous air pollutants (HAPs) exceed the threshold of 10 tons per year of a single HAP and 25 tons per year of total HAPs. Emissions of pollutants from the new line shall not exceed the following rates in tons per year: VOC/HAP: 130.5, NOx: 0.40, CO: 0.120, PM10: 4.66, SO2: 0.00086.

An air quality impact analysis was conducted for the original permit. That analysis found that emissions from the facility will not significantly contribute to or cause a violation of any state or federal ambient air quality standards or PSD increments.

The Department will issue a Revised BACT/MACT Determination along with the FINAL Permit, in accordance with the conditions of the DRAFT permit, unless a response received in accordance with the following procedures results in a different decision or significant change of terms or conditions.

The Department will accept written comments and request for public meetings concerning the proposed permit issuance action for a period of fourteen (14) days from the date of publication of this Public Notice of Intent to Issue Air Construction Permit. Written comments and requests for public meetings should be provided to the Department's Bureau of Air Regulation at 3000 Blair Stone Road, Mail Station #5605, Tallahassee, FL 32309-2400. Any written comments filed shall be made available for public inspection. If written comments received result in a significant change in the proposed agency action, the Department shall revise the proposed permit and require, if applicable, another Public Notice.

The Department will issue the permit with the attached conditions unless a timely petition for an administrative hearing is filed pursuant to sections 120.569 and 120.57 F.S.; before the deadline for filing a petition. The procedures for petitioning for a hearing are set forth below. Mediation is not available in this proceeding.

A person whose substantial interests are affected by the proposed permitting decision may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57 of the Florida Statutes. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3000 Commonwealth Boulevard, Mail Station #36, Tallahassee, Florida, 32309-3000. Petitions filed by the permit applicant or any of the parties listed below must be filed within fourteen days of receipt of the notice of intent. Persons filed by any persons other than those entitled to written notice under section 120.50(3) of the Florida Statutes must be filed within fourteen days of the publication of the public notice or within fourteen days of receipt of the notice of intent, whichever occurs first. Under section 120.50(3), however, any person who asked the Department for notice of agency action may file a petition within fourteen days of receipt of that notice, regardless of the date of publication. A petitioner shall mail a copy of the petition to the recipients of the address indicated above at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under sections 120.569 and 120.57 F.S.; or to intervene in the proceeding and participate as a party to it. Any subsequent intervention will be only at the approval of the presiding officer upon the filing of a motion in compliance with Rule 28-106.206 of the Florida Administrative Code.

A petition that disputes the material facts upon which the Department's action is based must contain the following information:

- The name and address of each agency affected and each agency's file or identification number, if known;
- The name, address, and telephone number of the petitioner; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests will be affected by the agency determination;
- A statement of how and when petitioner received notice of the agency action or proposed action;
- A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
- A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action;
- A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action; and
- A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

A petition that does not dispute the material facts upon which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by rule 28-106.301 of the Florida Administrative Code.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the department on the application have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. A complete project file is available for public inspection during normal business hours, 8:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays, at:

Dept. of Environ. Protection Bureau of Air Regulation Suite 4, 111 S. Magnolia Drive Tallahassee, FL 32301 Telephone: 904-498-0114 Fax: 904-922-9979	Dade County Dept. of Environmental Resources Mgmt. 33 S.W. 2nd Avenue, Suite 900 Miami, FL 33130-1840 Telephone: 305-372-0825 Fax: 305-372-9954	Dept. of Environ. Protection Southeast District 400 North Congress Avenue West Palm Beach, FL 33419-8425 Telephone: 888-681-6000 Fax: 561-981-8765
